brunner ::

A photograph of a modern office interior. A long, white, rectangular table is positioned in the foreground, with several green chairs with white bases around it. The room has large windows in the background, offering a view of a garden with a wooden fence and trees. The floor is a light, neutral color. The overall atmosphere is bright and airy.

EDITORIAL

Shaping the future with shared visions.

We present our latest product innovations that are influencing to shape the future of work. In a dynamic environment that shifts between communication, concentration, contemplation and collaboration, our new products are flexibly configured to meet the requirements of the modern working day – from conference rooms and open-plan offices to cafeterias, hospitality and seminar rooms.

wave

JEHS + LAUB

A table that leaves nothing to be desired.

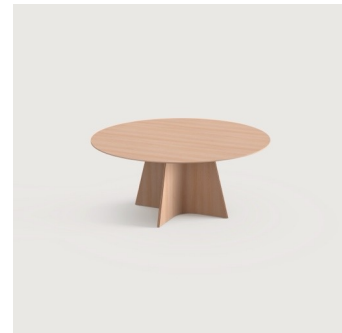

- The clue's in the name: the table leg covers have a wavy linear design
- In addition to large table dimensions, the steel construction of the table legs combined with a sophisticated support structure for the tabletop also enables a variety of shapes
- For use in exclusive conference rooms
- The wavy wood or metal cover is magnetically attached to the support structure and can be stained or powder-coated in various colours As can the pilaster strip that covers the side of the table leg
- The cable guide rail is inside the table leg. The magnetic attachment of the covers makes this easily accessible
- A wide range of customisation options are available on request

Variants Overview.

wave-shaped
base frame

cross-shaped
base frame

Flowing elegance.

wave combines elegance and functionality for sophisticated conference rooms. The striking wave shape of the table legs creates a unique design, while the robust steel construction ensures maximum stability even with large dimensions. The flexible supporting structure, including cable guide rail, allows for a wide range of table shapes and numerous customisation options.

When design and pleasure come together in harmony.

A new level of exclusivity for dining and hospitality. The elegantly curved, magnetically attached wood panelling combines style with flexibility. High-quality materials and bespoke options make it the ideal choice for stylish hospitality.

A table that sets big ideas in motion.

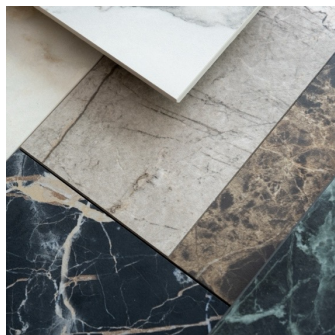

This table transforms the management office into a place of exclusivity and efficiency. Its elegant design provides ample space for strategic thinking and decisive discussions. Modern yet inviting, it enhances any sophisticated office ambience and makes a clear statement for a professional and stylish work environment.

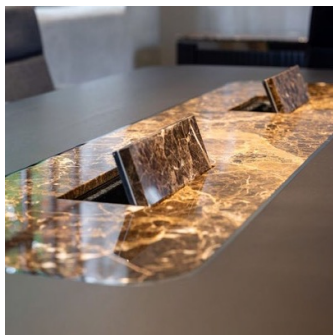

Individualisations.

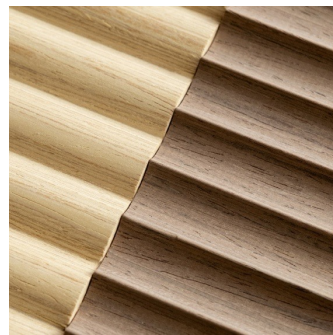

For even more exclusivity, wave can be customized with selected materials.

scoop

JEHS + LAUB

One chair, endless possibilities.

- Smart design
- Design versatility thanks to a range of options: different frame types with and without armrests and various upholstery options
- Integration of the new Brunner colour range
- Stackable depending on frame type
- Easy-to-clean and disinfect plastic shell made of high quality polypropylene with glass-fibre
- Back with recess for easy handling and cleaning
- Applications ranging from conferences to seminars, cafeterias to restaurants and even in the care sector

Lightweight design, versatile use.

scoop provides impressive design possibilities tailored to different areas of use – from cafeterias and restaurants to conferences and seminars. With a number of frame types, optional armrests and various upholstery options, it is flexible enough to fit into any setting. Perfect for relaxed coffee breaks or lively meetings.

Open to anything. As long as it's comfortable.

With its open-back design, scoop combines lightness with practical functionality. The elegant design creates a delicate look and makes everyday handling easier. Depending on the frame type, scoop can even be stacked. Ideal for cafes, bistros or seminar rooms where dynamism, lightness and efficiency are required.

wait

ROLAND SCHMIDT DESIGN

Perfectly dressed up.

- Timeless design for classic waiting areas
- Durability through the use of high-quality materials
- Die-cast aluminium brackets enable easy attachment to the cross beam
- A shell-specific adapter bridges the gap between the shell and the bracket for connection to the beam seating system
- A large range of shells, made of mesh over plastic, wood and upholstery make it suitable for use in a wide range of areas
- Optional armrests on the end and between all seats plus tray tables offer additional design options

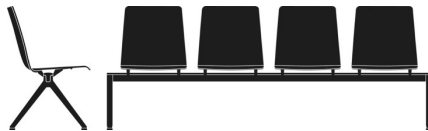

Waiting can be this pleasant.

And so worth it. With a wide selection of shells – from mesh and plastic to wood and upholstery – wait is perfectly suited to a wide range of settings. It can be extended from a two-seater to a five-seater and is flexible enough to adapt to your needs. Optional armrests and tray tables offer additional design options, making the bench a versatile solution for any waiting area.

boards

OSKO+DEICHMANN

Overview.

USPs:

- The media cart is the logical addition to the extensive boards range
- Perfect for presentations and meetings e.g. with a large screen and video conference system
- Flexible and quickly ready for use in dynamic environments, such as offices, meeting rooms, co-working spaces etc.
- The high-quality steel construction of the frame and matching screen mount can accommodate screens of up to 85 inches
- With a useful shelf in various finishes
- The punched metal shelf provides additional storage space for items such as boards stools and toolboxes, etc.

It is this easy to get presentations rolling.

The boards media trolley is the logical addition for flexible presentations. With its robust steel construction and matching screen holder, it holds even large screens safely and stylishly. Flexible and quick to set up – making your presentation a success before it even begins.

pads

JEHS+LAUB

Overview.

USPs:

- Expansion of the pads range
- Modern, fresh design combines comfort and flexibility
- Lightweight, manoeuvrable stool for use in lounge and waiting areas such as libraries and co-working spaces
- Also suitable for use with the pads range of chairs and sofas
- Available on gliders or casters

The dice are rolled.

Whether on gliders or casters for dynamic seating – this stool always provides flexibility and comfort. As the perfect addition to armchairs and sofas from the pads collection, it combines mobility and comfort in a stylish way. Ideal for lounge and waiting areas, co-working spaces and wherever additional seating is welcome.

ray work

JEHS+LAUB

Combines ergonomics with elegance.

- Novel and exceptionally light office swivel chair in an elegant ergonomic design
- A dynamic seating experience thanks to a clever combination of materials and a synchronous mechanism with automatic weight adjustment
- Flexible plastic frame design that adapts to body movement
- Premium mesh back with a cosy feel: breathable and flexible while retaining its shape
- Wide range of colour and material combinations with mesh back as well as classic full upholstery

Sustainability in perfection.

ray work in the colour lava is
made from recycled plastic –
without compromising on
design or quality.

Comfort at its most beautiful.

The flexible frame construction, also available in lava recycled plastic, provides exceptional comfort. For even greater comfort, ray work is available in a fully upholstered version with elegant wave stitching. Ideal for modern work environments where ergonomic seating comfort and aesthetic design are in perfect harmony.

Elegance and ergonomics at their best.

Whether in the office, a conference room or the home office: The ultra-light and elegant ray work swivel chair can be customised and seamlessly adapted to suit any environment and body movements, creating a completely new seating experience.

hero plus

ROLAND SCHMIDT DESIGN

The Lightness of Sitting.

- Addition of a cantilever chair to the range for use in conference set-up
- High-quality mesh covering: perfectly made for longer sitting as it is breathable, elastic but consistent in form, robust, hard-wearing, easy-care and quick drying, high light and colour fastness
- Circumferential, robust plastic frame reinforced with fiberglass serves as a protective edge and at the same time forms an ergonomic knee roll and grip or carrying bar in the back
- The mesh material adapts to suit any body shape
- Mesh material also available in a flame retardant version (B1), several colours available
