# Areas of Expertise.

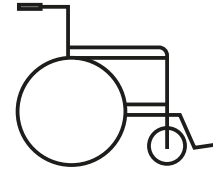

# Your Challenges.

We never lose sight of the most challenging practical requirements when we are developing our furniture because your needs are what matters most.

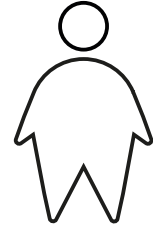

We offer customized solutions for every requirement. For the highest standards of hygiene and ergonomics.

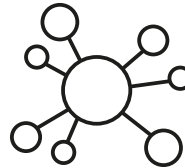

D E M E N T I A

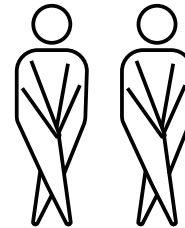

L I M I T E D

# Hygiene.

## HYGIENIC FABRICS

Hygiene is a key factor in public welfare facilities – not least because those requiring care often suffer from incontinence.

Our seating ticks all of the boxes when it comes to hygiene requirements. Thanks to highly effective moisture protection. Thanks to fabrics that are extremely resistant to dirt and urine.

### Functional Fabrics

Premium artificial leather that can be washed

Disinfectant-resistant

### Microfibres

Incredibly easy to clean

### Textiles

A soft sensory experience

### Mesh

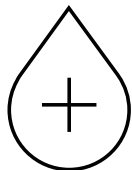

Flexible and breathable

Many of our fabrics can be washed at up to 60°.

# Hygiene.

## REMOVABLE COVERS

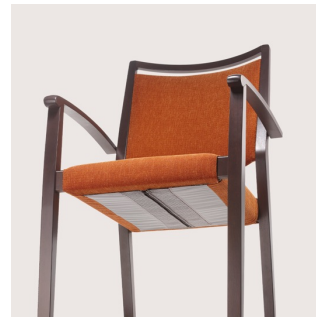

Meeting the highest of hygiene standards with an attractive design is not a contradiction for us.

We provide clean solutions for use in sensitive settings. Our products come with upholstery and covers that are easy to remove so that they can be changed and cleaned.

### No need for tools

Clip so that no tools are needed to remove or attach covers.

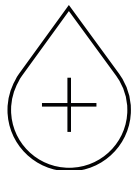

### Effective concealment

Zips arranged in a cross layout to allow for quick removal.

# Hygiene.

## ROBUST SURFACES

Who knew hygiene could be so stylish? Our surfaces are extremely robust and resistant to disinfectant.

We also use beech as a type of wood with natural antibacterial properties – either in solid form or in an extremely sturdy bonded laminated wood variant.

### **Nano Tec Brunner**

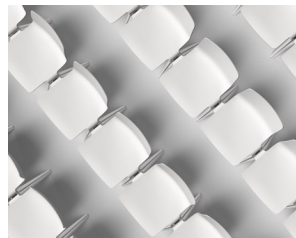

Resistance to scratches and wear and tear

Antibacterial properties

### **HPL**

Easy to clean

Extremely robust material

### **Plastic**

Easy to clean

Extremely robust material

### **Wood**

Surfaces sealed with water-based varnish

Beech used thanks to its antibacterial properties

### **Metal**

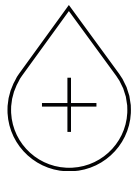

Chromed surfaces that are easy to clean

Antibacterial powder coating

# Hygiene.

## SPECIAL DESIGNS

If it is hard for dirt to adhere, less cleaning is required.

Our designs are an absolute dream from a hygiene point of view, as they make it difficult for dirt to gather and simplify the cleaning process.

### Hidden bolt connections

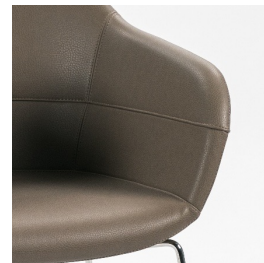

Easy to clean

Improved design

### No frames

Simple handling

### Integrated Seat Upholstery

No joints where dirt can gather

# Ergonomics & Functionality.

BEST SEATING COMFORT

Sick and elderly people often end up sitting down a lot and require a great deal of support from their furniture.

Our furniture takes care of ergonomics and safety – just look at our armrests with a knob as a standing aid and tables with space for a wheelchair underneath.

**Armrest with knob**  
Standing Aid  
Sitting Aid

**Upholstered frame**  
Comfortable sitting  
Cosy ambience

**Knee roll**  
Optimised blood circulation  
Long stints of sitting made easier

**Frame-free design**  
Plenty of legroom  
Space for a wheelchair underneath

**Particularly resilient**  
Heavy-duty chairs, such as jump XXL, carry up to 250 kg  
Other series, such as feel, carry up to 180 kg

**Various seat heights**  
Higher and lower seat heights  
v  
Depending on use

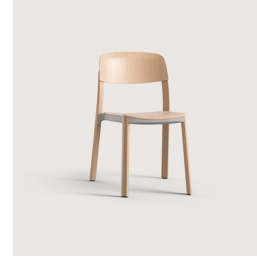

# Ergonomics & Functionality.

## EASY HANDLING

Staff who work with patients in the care sector all day long are grateful for anything that makes their job a little easier.

And that's why we design lightweight chairs that can be handled with ease. They can even be stacked up if required.

### Lightweight Materials

Low weight, e.g. thanks to resource-saving design and plastic elements.

### Casters

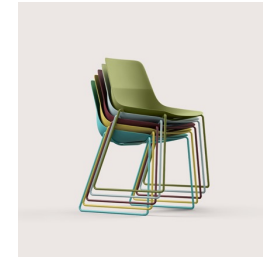

Option for one person to push furniture with ease

Space-saving storage solution

### Backrest Bar

Easier handling

### Option to stack

Low stacking height thanks to flat metal frames and more

# Fire Protection.

## TESTED MATERIALS

We even only use materials that comply with the minimum fire protection regulations for our furniture without upholstery.

This ensures compliance with the DIN66084 P-a or P-b fire protection standard applicable to contract furniture without upholstery.

We also provide **seating made entirely** from non-flammable materials in line with the most stringent of requirements.

Bases made from non-flammable steel tube or aluminium

Tables with premium, heat-resistant HPL carrier plates as per **EN 438**, with flame-retardant table tops available on request

Flame-retardant varnish for our wooden surfaces as per **DIN 4102 B1**

# Fire Protection.

## TESTED MATERIALS

Fire protection considerations are just as crucial for chairs with upholstery. We have a wide range of fabrics that are certified in line with DIN 4102-B1.

This ensures compliance with the DIN66084 P-a or P-b fire protection standard applicable to contract furniture without upholstery.

### Standard

- Cover fabric that complies with EN1021 1+2 (not fabric with specific fire protection properties)
- **P-c classification (low)**  
Cigarette test in accordance with **EN 1021, part 1**

### Extra

- Flame-retardant cover fabric that complies with DIN 4102 B1
- Upholstery foam to CMHR\* standard
- **P-b classification (medium) & BS 5852 Crib 5**  
Fire protection test **BS 5852** with Crib 5 ignition source

### Standard plus

- Flame-retardant cover fabric that complies with DIN 4102 B1
- Standard upholstery foam
- **P-b classification (medium)**  
Match test in accordance with **EN 1021 part 2**

### Ultra

- Flame-retardant cover fabric that complies with DIN 4102 B1
- Upholstery foam to CMHR\* standard
- Additional padding made from non-flammable fire protection fabric
- **P-a classification (high)**  
Paper cushion test in accordance with **DIN 54341**
