01

Product idea.

Always ready for use.

- Flexible stacking table for quick room configuration in the event and seminar sector
- Timeless design with thin table top, extremely versatile
- Exceptionally practical, tool-free linking in a row
- Easy handling thanks to casters subtly integrated in the frame
- Space-saving storage and stackable design with matching transportation trolley
- Enables assembly and disassembly by a single person

basic row is always ready for use. The flexible table for settings that change as situations demand can be quickly lifted from a stack of ten or be tilted from the transportation trolley. A single person can position it as required on casters that are subtly integrated into the round-section steel tube frame. By simply pushing on and pulling apart, basic row links and detaches without the need for tools, thanks to intelligent stacking bumpers positioned beneath the elegantly thin table top. This saves valuable resources in the event and seminar sector.
