Inspiration and detailed views

01

Product idea.

# Expressive in terms of form and colour.

- Cosy, comfortable chair featuring various frame versions made of wood or metal
- Dynamic seat shell lines
- Great design latitude thanks to one- or two-coloured upholstery and a choice of different frame types

# Expressive in terms of form and colour.

## **Lightweight but still well upholstered** -this is crona.

The upholstered shell appears to float on the delicate frame. A dividing seam between the upper back section and the lower seat area adds an interesting accent to the single-colour full upholstery.

The easy chair with two-colour upholstery, or in a combination of fabric and leather, is particularly refined looking. The leather upper section provides ideal protection for the armrests and protects the back from wear and tear.

The **seat cushion insert** on all crona models is especially comfortable and can be replaced individually.

# Light yet stable perfection.

crona's intrinsic properties also impress. A padded steel frame gives the shell stability and durability. This makes crona the perfect companion for the lounge, office or cafeteria.

The choice of various frame types that slip underneath the seat shell, either chromed or coated, as desired, provides considerable design freedom.

**Height-adjustable central foot frame:**  
as a four-legged frame on gliders or five-star frame on casters.
