01

Product idea.

The range of all-rounders for large venues.

The first is one of the most popular ranges specifically for large spaces. It is a range that is continuously evolving. And that works for every application thanks to its wide variety of models.

Be it in trade fair halls, conference rooms or seminar rooms - first adapts to any situation and offers functionality down to the smallest of details.

- Ergonomically shaped seat shell
- Space-saving, vertical stacking
- Quick, integrated interlocking frames
- Optional seat and row numbering

Ergonomic design, maximum functionality.

The seat shell features an ergonomic, three-dimensional shape for exceptional seating comfort.

At the same time, the innovative folding seat enables the chair to be stacked vertically and in a way that saves space, assisted by QuickClick gliders with stacking guides.

This means that, depending on the model, up to 15 chairs can be stacked vertically.

A shell that makes a colourful statement.

The seat shell made of moulded beech plywood is available in various stain colours and as an upholstered version upon request. Our fabrics not only look good, they also boast optimal quality that is sure to win you over.

Selected models are also available with an easy-care plastic shell that has a glass-fibre reinforced core component in addition to their innovative fold for maximum stability. Add extra splashes of colour with bright shades from our current Colour Collection.

Perfectly arranged in rank and file.

The four-legged frame made of chromed steel tube gives first a timeless, elegant appearance. At the same time, it is also particularly robust and easy to clean.

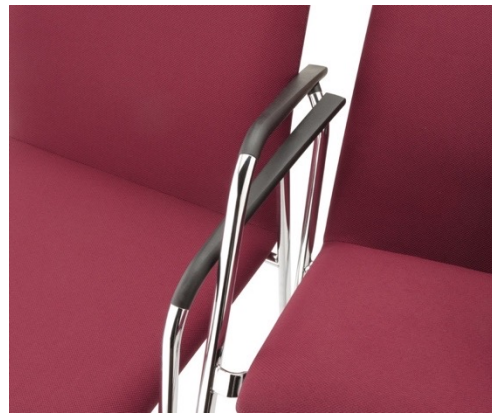

What's special about first? All models can be linked at the frame, without the link being visible. This means handling is also quick and convenient.

The latest first place development also allows any combination of variants, both with and without armrests, to be linked together.

The frame is invisibly linked by the interlocked base parts and the front cross-brace.

Additional fixed or mobile connecting elements are not needed.

The right equipment.

Seat and row numbering

- Manual numbering with magnetic plates
- Electronic, contactless numbering with battery-free display on e-paper technology

Transportation and storage trolley

- Transport the chairs between spaces (1004F)
- Store the chairs on a trolley in the appropriate rooms (1002-1, 1002-2, 1008F1, 1008F2)

02

In details.

An unbeatable team.

With first, we offer the perfect solution for all requirements. Find out about the different models on offer and their diverse range of design variants.

first choice

Note:

first place, first line, first class and first choice cannot be stacked or linked alternately.

first place.

first place is the lightweight design (from 6.4 kg) in the range and allows any combination of variants, both with and without armrests, to be linked together.

- Armrests with black plastic cover
- Seat shell made of moulded beech plywood, not upholstered or in various upholstered designs
- Will also be available with a plastic shell in the future
- Can be stacked vertically up to 15 chairs high*

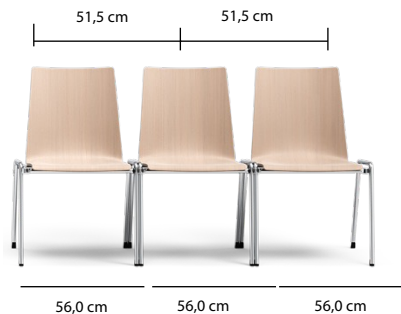

* on a flat surface

first place.

Small axial dimensions make first place the perfect candidate to make a big impression in the front row. And that goes for the version with armrests too.

chair-chair

chair-chair with armrest

chair with armrest-chair with armrest

first line.

first line is a vertical stacking chair with armrests. Thanks to the versatile shell and upholstered designs, it works in a large range of applications.

- Armrests with plastic cover
- Seat shell made of moulded beech plywood, not upholstered or in various upholstered designs
- Optionally available with a plastic shell
- Can be stacked vertically up to 12 chairs high*
- Axial dimensions: 52.5 cm (inside the row), 55.0 cm (outer chair)

first class.

first class features a distinctive design, is extremely ergonomic and, above all, very practical.

- Armrests in black plastic
- Seat shell made of moulded beech plywood, not upholstered or in various upholstered designs
- Can be stacked up to 8 chairs high*
- Axial dimensions: 52.5 cm (inside the row), 55.0 cm (outer chair)
