A-Table

Delicate and in Perfect Shape.

Discerning folding table for seminar and conference rooms.

Design: jehs+laub

A-Table

DELICATE AND IN PERFECT SHAPE.

- » Discerning folding table for seminar and conference rooms
- » The shape of its legs perfectly complements the A-Chair
- » Delicate look thanks to the bevelled, lightweight table top
- » Tried and tested one-hand operation of folding mechanism; unlatching at the push of a button
- » Maximum legroom thanks to new, tilting stacking buffers

A modern seminar room with a large window on the left, showing a view of another building. The room is furnished with several A-Tables, which are long, rectangular tables with a light wood top and a silver metal frame. The tables are arranged in a row, and several light-colored wooden chairs are placed around them. The ceiling has recessed lighting, and the floor is a light, reflective surface.

The A: Setting a Clear Sign.

Delicate shape in perfection:
the A-Table.

Even at first sight, the A-Table shows true class, thanks to its unobtrusive, modern formal language. It makes a clear statement for discerning taste and style in any seminar or training room. At the same time, the delicate lines cleverly hide its functional complexity. For what you really don't see at first glance is that the A-Table is a folding table, easy to operate, and stackable. When set up, the frame is flush with the table top side, providing more legroom and a more appealing look – when any two tables are placed in a row, their legs seem to merge.

An Unbeatable Team.

A-Table and A-Chair.

Not only when placed in rows, but also as an individual ensemble, A-Table and A-Chair show that they are just made for each other. The table frame repeats the A of the chair frame. And like the A-Chair, the table legs are made of die-cast aluminium, turned spherical and tapered. This not only combines lightweight crowned construction with maximum stability, but also creates a harmonious unity of table and chair.

The bevelled light-weight table top and the frame with its spherical and crowned tapered legs perfectly match the A-Chair silhouette.

The newly developed stacking buffers only unfold under the shifting weight during stacking. Otherwise, they are tilted flat underneath the table top without interfering with leg room at all.

A-Table

Folding table

- V-shaped table legs in die-cast aluminium, polished, foldable
- Optional with table legs coated in the colours lava, stone, ice or clay
- With folding mechanism in flat steel and with a supporting clamp in round steel, chromed
- Release lever in steel panel lacquered in RAL 9006

- Folding table tongs in black plastic, glass fibre reinforced
- Various table top and edge versions available
- Plastic gliders

Notes

See our current pricelist for details, prices and terms of business.
We reserve the right for technical changes, errors and colour variations. Some of the models depicted are special versions that are subject to additional costs. Wood is a natural product. For our lines of furniture, we exclusively use high-quality beech wood from sustainable forestry sources. Despite careful selection of the wood, there may be variations in colour. Differences in colour and structure do not constitute a reason for complaint but are rather a manifestation of the individual character of wood furniture.
