Tables and Accessories

CONTENT

Dear Sirs,

Whatever your requirements might be, we have the right table for you. As you browse through our catalogue, you will notice the variety and diversity of our programme: folding tables, central column tables, 4-legged tables, wooden tables or standing tables; tables for large venues, cafeterias or the office – we have a suitable table for every requirement and task as well as every area of application.

We pay particular attention to ensure the highest level of quality combined with outstanding functionality and exquisite design. Sophisticated detail solutions and intelligent accessories make working more pleasant. Flexibility is another important focus. A case in point: various table top sizes and shapes featuring a variety of edges and surfaces can be flexibly combined with the various table series frames. So that you as the user will have the greatest possible individual benefit and more time for what's important to you.

Additionally, we recommend our current price list for getting an overview of all the versions and for more detailed information.

Wishing you lots of fun discovering our table variety.

Sincerely yours

Helena, Rolf, Dr. Marc, Philip and Tina Brunner

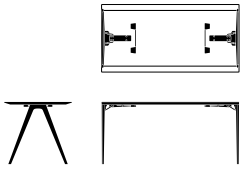
Folding tables

A-Table

Design: jehs+laub



9770

A-Table 9770/0 . A-Chair 9702

9770/0
160 × 80 | 180 × 90 cm
200 × 100 cm

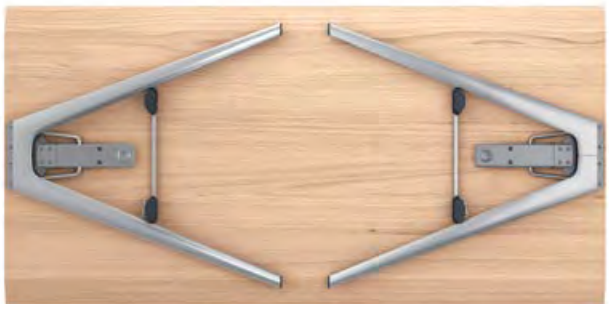
9770/7
280 × 120 cm

Delicate and in Perfect Shape.

Even at first sight, the A-Table shows true class, thanks to its unobstrusive, modern formal language. It makes a clear statement for discerning taste and style in any seminar or training room. At the same time, the delicate lines cleverly hide its functional complexity. For what you really don't see at first glance is that the A-Table is a folding table, easy to operate, and stackable. When set up, the frame is flush with the table top side, providing more legroom and a more appealing look – when any two tables are placed in a row, their legs seem to merge. On request the A-Table is also available as conference table with in-set table legs.

9770
V-shaped table legs, die-cast aluminium, polished, foldable. With lightweight board, HPL table top surface, oak or American walnut veneer. New CRKL edge at the long sides. Optional: table legs coated lava, stone, ice, or clay, matching the available chair shells

The bevelled lightweight table top and the frame with its spherical and crowned tapered legs perfectly match the A-Chair silhouette.



A-Table folding mechanism

- Low-noise
- Maintenance- and wear-free
- Integrated failover of table legs

An Unbeatable Team.

Not only when placed in rows, but also as an individual ensemble, A-Table and A-Chair show that they are just made for each other. The table frame repeats the A of the chair frame. And like the A-Chair, the table legs are made of die-cast aluminium, turned spherical and tapered. This not only combines lightweight crowned construction with maximum stability, but also creates a harmonious unity of table and chair.

The newly developed stacking buffers only unfold under the shifting weight during stacking. Otherwise, they are tilted flat underneath the table top without interfering with leg room at all.

Attractive design, stable and sturdy – the latest generation of folding tables.

basic is equipped with the new STS stability system. The folding mechanism with diagonal bar and 3-point mounting ensures maximum stability and sturdiness. The mechanism works as quietly as you have come to expect, is non-wearing and does not require maintenance. The integrated safety folding device of the table legs allows for the safe transport of the table. The surface of the table top is made of high quality HPL. Particularly durable: the extremely robust APK Air Protect edge made of elastic black plastic with an interior air chamber. basic also proves visually compelling with its clear and linear design.

The delicate table with the shapely tapered round steel tube legs.

For office, meeting, training and seminar rooms: get.up is a shapely and stable folding table, easy to handle thanks to its non-wearing and maintenance-free folding mechanism. The tapered rounded steel tube frame without cross-bars creates an attractive effect and leaves legroom on all four sides. This four-legged table can be folded and stacked with table lengths starting up from 80 cm already.

Consistent and sophisticated: the intelligent design makes the patented mechanism invisible.

A truly innovative folding table: this intelligent construction cleverly conceals the table's high degree of functionality and its patented mechanism. Its practical added extras become apparent during day-to-day use: really simple handling, safe set-up and fold-down, storage protection thanks to integrated stacking protectors. sleight is a stable folding table which is unmatched in its ease and range of use as well as its aesthetic looks. This makes it ideal for high-end seminar and function rooms.

Light, lighter, sleight ultralight. Low weight and intelligent functionality ensure ultimate ease of handling.

Ideal for all situations where there is constant change: sleight ultralight – the lightest folding table in the world. In its lightest version it weighs no more than 12.5 kg. The patented folding mechanism means that one person can easily set it up – even single-handedly if necessary. Even in this ultra-light version it offers many different possible combinations, the stable single-pillar aluminium frame leaves plenty of legroom on all sides.

trust – functionality and visual appearance of the highest standard.

A table programme that thinks along. Very practical – without looking practical: its four-legged look won't have you thinking that this is a folding table. With three different frames: square section steel or round section steel – classically mitred or rounded in the basic version. The surface offers a choice of HPL or veneer.

2237
Square steel tube frame
chromed, table top surface HPL or beech veneer, adjustable gliders, various optional edges, coated frame, table top or edge stained, further options

2247
Round steel tube
chromed, „mitre", table top surface HPL or beech veneer, plastic gliders. Various optional edges, frame coated, table top or edge stained, further options

2248
Round steel tube
rounded, chromed, table top surface HPL or beech veneer, plastic gliders, various optional edges, coated frame, table top or edge stained, further options

In the right place: an intelligent mechanism to make users happy.

trust offers a lot of space – but remains very simple at the same time: the single-handed operation means it can be folded down and carried away by one person. The offset position of the legs when folded further reduces the space required during storage. Handling, which is practical in any case, can be made even easier with a transport cart, for example, on which up to ten tables can be moved and stored.

2248/0

Optional: moving trust becomes even more convenient through casters in two of the feet.

Added handling convenience: thanks to the fourfold stable chair retainer, chairs can be placed out of the way for cleaning the floor.

Setting up, dismantling, transport and storage – everything becomes easier with torino.

Nice and tidy: the torino nesting table proves compelling with an ingeniously simple and stable mechanism, making it very intuitive to operate and stack. It becomes so small that many tables can be stored on minimal space. The table can be optionally equipped with a modesty panel or an integrated media system. And it can all be done by a single person because torino can be folded and transported with just one hand. The simple handling also makes it very flexible to use. It does not take long to arrange the greatest variety of configurations in the room. Thanks to numerous additional modules, it can be used in a great variety of situations. And thanks to its clear formal language, it also proves visually compelling.

9410

The extra large yet easy-to-use nesting table.

Some projects require an extra-large amount of space. That's what the torino XXL nesting table is for. With table top dimensions of up to 240 × 140 cm, there is a lot of space for working and learning together. Two columns at either side provide the necessary stability. Yet the table is easy to move, thanks to its smooth-running casters that even allow for easily traversing sills or obstacles. Once the table is in its required position, the locking mechanism on all four casters helps to keep it in place. The extra large torino nesting table is also equipped with a maintenance-free and stable folding mechanism so that it takes up little space when stored.

9411/0

7070/7

dress 7070/9 . dress 7001

7070/9
220 × 110 cm

Emphatically Beautiful and Healthy.

Wherever people have to sit for any length of time, dress represents a young alternative conducive to health. In offices, cafés, even in the reception area, this novel standing aid will support active sitting. It is continuously height-adjustable, thus perfectly adaptable for any task or tallness. A high-tech fabric hides the stable mechanism and grows and shrinks in sync with each adjustment. Here, form truly follows function – inviting to try out dress.

7070/9
Telescopic column frame, electrically height adjustable from 74 cm to 110cm. Oval flat steel base plates with circumferential polyurethane base, colour: lava or stone. Stocking cover made of permanently elastic functional knit fabric "stretchline", colour: black or stone. Integrated cable tray, cable lid and profile box optional. Rectangular table top with rounded short sides, table top surface: HPL or oak veneer

The high-class conference table: modular construction meets classic design.

Every conference is different but the table system remains the same. fina conference was developed as a perfect match for the successful chair series finasoft. The timeless beauty of the fina conference series not only allows for the greatest variety of table configurations but most notably also for individual tables featuring a central or fourfold column. Frames and table tops can be individually combined depending on design and available space while always forming a visual entity. They may accommodate a large number of people and can be matched precisely to the respective room and the number of participants – for this, even very long table tops are available. The modular foot extensions are available in various versions. T- or Y-foot, with or without lower braces – they prove compelling thanks to their soft, rounded design reduced to the essence. This is highlighted by the delicate looks of the table top with a visible edge of only 10 mm thickness.

6900
Different frames, polished die-cast aluminium extension, round steel tube column(s), chromed, adjustable gliders, chromed, table top surface HPL, oak veneer or American walnut veneer, different optional edge version

Central column frame
With one or four columns, lower brace oval tube chromed, mounting plate powder-coated black

Plectrum frame
Lower brace oval tube chromed, mounting plate powder-coated black

Intelligent functionality creates space for what's important.

The table tops are available in many different shapes and surfaces in HPL, oak or American walnut. The fold-down horizontal cable channel made of extruded aluminium allows for a variety of cabling possibilities. Various vertical cable solutions, rigid or flexible, supplement the sophisticated cable management. Thus fina conference ensures both tidiness and safety.

Cable lids and cable ducts
hide electrification almost completely.

Vertical clip-on guide rail for cables
For each range, the matching accessories are available to lead the cables properly along the table leg.

Horizontal cable channel
Different cable channels mounted underneath the table top can hold numerous cables at once.

fina conference 6924/8 . finasoft 6756/A

High Stability, Lots of Legroom.

The especially large round table top is supported by a four column frame consisting of polished die cast aluminium feet and of chrome plated steel tube columns. They make this table particularly sturdy while offering lots of legroom all around.

7961/9

Very large selection of table top formats available.

A Touch of Class for Any Conference.

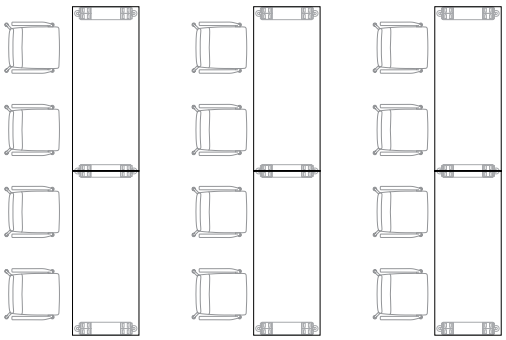
The modular conference table programme fina flex is impressive thanks to the sophisticated interplay of elegant shapes, delicate lightness and convincing stability. With its appearance of independent design statement and a high degree of adaptability to the respective room or situation. And with its perfectly harmonious match with the premium chairs from the finasoft series as well as the successful fina conference programme.

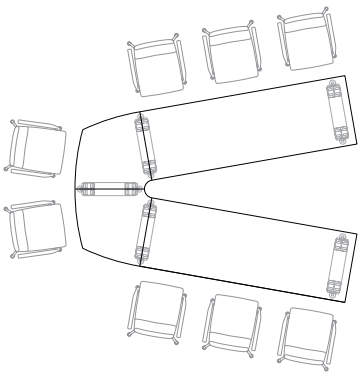
Thanks to bevelled CRKL edges, the lightweight table top appears to be even more delicate.

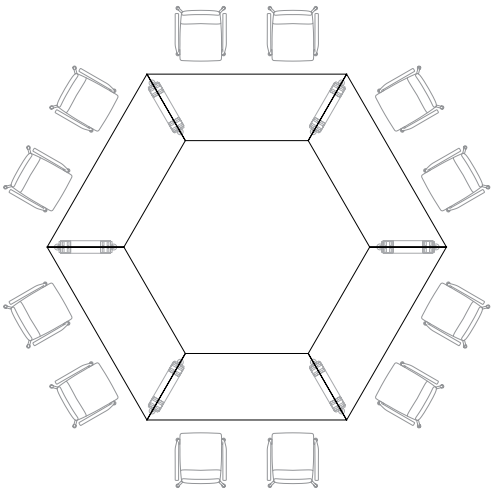
7911/0

Variety is the Watchword.

The modular and comprehensive system allows to design a great variety of table configurations – regardless of the number of participants and the size of the room. For that, the system offers a comprehensive variety of table tops featuring different edge variants in different shapes and sizes. But regardless of the respective configuration – fina flex always stays light and elegant.







fina flex 7900 . finasoft 6722/A

Convincing in Every Regard.

Each seminar and conference calls for its very own seating arrangement. The timelessly beautiful series fina flex offers a great variety of table configurations and thus always the right solution. For this, frames and table tops can quickly and easily be combined and rearranged, depending on the respective design concept and the amount of space needed. All the while, the clear, reduced design guarantees that fina flex stays a visual entity at all times.

Two table tops, but only one leg: easy table leg assembly without tools, at the same time linking two table tops.

Vertical cable ducts: magnetic aluminium profiles conduct the cables along the table leg.

Optional modesty panel
The panels (height 40 cm) are mounted and locked shock-proof in an instant, without having to use any tools. The surfaces can be selected to match the table tops.

The connecting element of one table leg takes both tops, solidly locking each with the other. When locked, the fingers of the connective elements hook into the metal plates set into the table tops. Thanks to the patented mechanism, two table tops may be connected or separated without any tools.

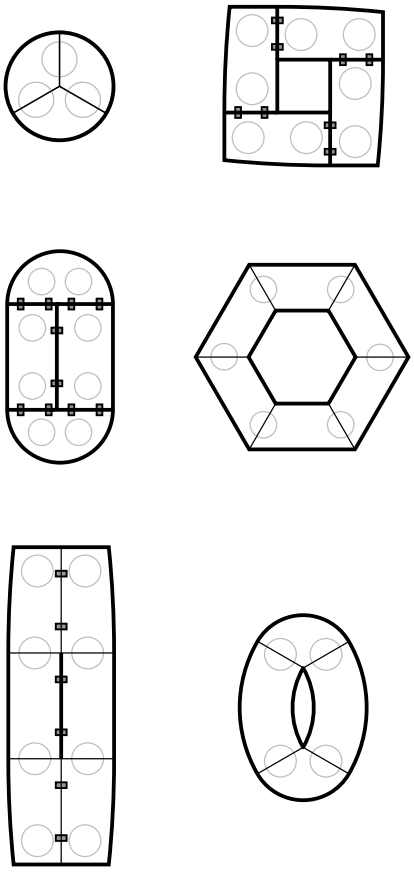
Well combined: the representative table for every room and requirement.

From large groups to private talks: spira combinations can handle them all. Table tops in various shapes and sizes allow for innumerable variations, depending on requirement and venue. This table proves compelling thanks to its classic representative design, the high-quality materials as well as the excellent finish. The chamfered edge gives spira a light look. Depending on the size of the table top, it is supported by one or several central columns made of shiny chromed steel. Thus the table offers a lot of legroom all around.



2700
Column and cover shiny chrome, base plate steel, RAL 9007F or base plate in black granite. Table top surface HPL, beech veneer or oak veneer. Optional table top or edge stained, electrification, linking device

MEM edge

spira is optionally available with media module or – as shown here – with power sockets.

For more information on electrification, please cf. page 140.

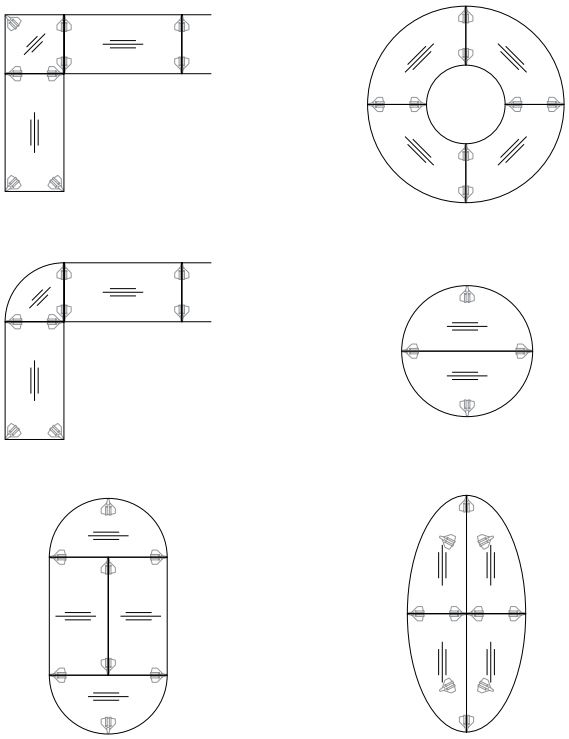
Not just a table but a concept – with many practical benefits.

A thoroughly representative series. And at the same time pleasantly minimalist. The basic version of state is an elegant individual table, but the possibilities are virtually endless when table tops of different shapes and sizes are combined – suiting any surroundings and seating requirements. state proves compelling thanks to simple handling. A case in point: one leg can connect two table tops, saving time while setting up and dismantling, and saving material as well. Furthermore, the tables can be equipped with electrification. The cabling remains invisible thanks to matching modesty panels. As a result, the conference room will always look tidy.



2801
The table legs are not bolted but are fixed with connecting fittings – that means the configuration can be quickly changed as required, even without any tools.

Intelligent detail solutions save time and create space for what's important.

One leg is good enough for support. The state table legs are designed in such a way that a single one can easily support two table tops. The simple-to-operate locking device means that the table is absolutely stable even while being set up. The leg at the table end is positioned at a 45° angle and thus rounds things off nicely.

2800
Table leg
Anodised aluminium line press profile and die-cast aluminium support plate, lacquered finish RAL 9006 white-aluminium, tool-free mounting and dismantling, table legs positioned at 45° angle at individual table corners, when connecting two adjacent tables, legs are at right angles to edge. Shiny chromed aluminium legs available upon request

Table top
HPL, beech veneer or oak veneer table top surface, embedded support plates underneath the table top. Table top or edge optionally stained, electrification, further options

Yet another extra: state is optionally available with electrification.

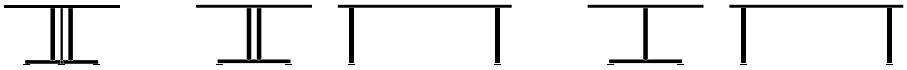
torino

Design: Wolfgang C.R. Mezger



9461 **9471** **9470**

The versatile and high-quality table programme with the clear formal language.

torino offers a large range of shapes and sizes and is particularly easy to handle. The clear and minimalist formal language means that torino can be combined with almost every chair series. One design characteristic of the range: the high-quality foot with a stable bearing surface – not just a visual benefit but also an advantage in terms of added stability. Additional flexibility is offered by other elements such as side tables (optionally height adjustable and foldable), side trolley, lectern and tea-cart (cf. p. 114), equipped with gliders or casters, depending on the requirement.

The new interpretation of the classic bistro table – with sophisticated details and surprising material combinations.

The due bistro table stands out through its very own formal language. The central column, panelled in laminated wood and fanning out at the top, makes an equally dynamic and stable impact. The laminated wood panelling is available in beech or, with an extra charge, in oak. The table top comes in HPL or veneer. The flat base is made of steel – with metal-effect anthracite as standard, optionally also available with white powder coating.

Stable, functional and easy to transport – thanks to innovative casters.

This bistro table knows how to convince, thanks to its patent pending detail solutions. A case in point: the innovative horizontal roll serves as a shapely table foot while at the same time making easy transport possible. In a horizontal table position, the roll is at rest. The table remains stable and safe. If the table is tilted, however, it can be rolled away easily and without additional handling. Thanks to a locking lever, the foot frame can be folded, so that the table can be stored taking up only minimum space.

The stable and functional standing table – easy to move on innovative extension casters.

This table proves compelling above all thanks to its clever detailed solutions: the horizontal casters serve as the table legs and as casters for transport at the same time. If the table is in a horizontal position, the horizontal casters are flush to the floor. The table stands stable and secure. But if it is placed at an angle, this innovative nesting table can be rolled quite easily on its casters without additional handling. The feet can even be folded by operating the locking lever for space-saving storage. In this way the table can be stored in the smallest space. The round table top, which automatically locks when put upright, is available in two diameters and with a choice of HPL or beech veneer surface.

Robust Variety Just In Case.

This table system with its border frame offers multiple combinations and will tackle any task. Its clear concept is just as striking as its top quality in terms of material and workmanship. The border frame is made of steel, and the corner nodes are made of die-cast aluminium. This allows a combination with thinner table tops available in different versions and with different edges. A special characteristic of these tables: the table top corners are rounded according to the shape of the corner nodes.

The system is completed by matching modesty panels made of web fabric or wood which can be mounted without using tools.

- Table system with traverse under-frame, many combination options.
- Clear concept and top quality in terms of material and workmanship.
- Pronounced stability allows the combination with thinner table tops.
- Rounded table tops optional matching the corner nodes.

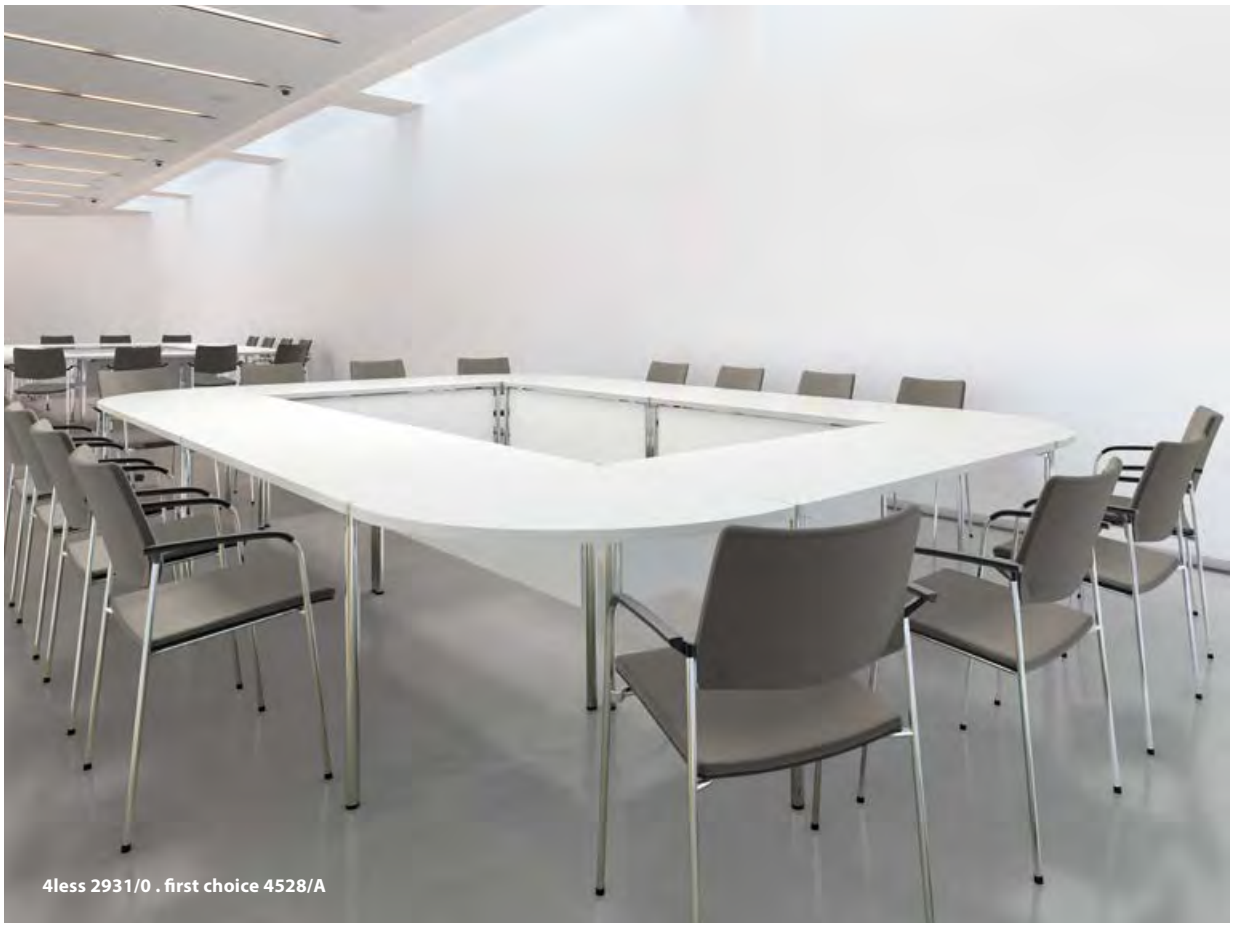
2930/0
Polished die-cast aluminium foot node, steel tube braces 30 × 25mm, chromed, steel tube foot ø 35mm, chromed, adjustable plastic gliders, table top HPL or beech veneer. Optional: various edge finishes, table top or edge stained, coated frame, and further options

4less.
Clean Slate.

This stackable table system featuring individual legs attached to self-supporting table tops goes along with everything and can be extended in all directions without any problem. And 4less grants maximum legroom – especially when placed in a row, because the brackets for the chromed or powder-coated table legs are mounted right underneath the rounded corners. Matching modesty panels made of web fabric or wood that can be mounted without using tools complement the system's possibilities.

2931/0
Polished die-cast aluminium support plate, steel tube foot ø 35mm, chromed, adjustable plastic gliders, table top HPL or beech veneer. Optional: various edge finishes, table top or edge stained, coated frame, and further options

- Stackable table system, with individual legs
- Greatest possible leg room – especially when linked to form rows
- Matching modesty panels made of mesh or wood
- Rounded table tops optional matching the corner nodes



4less 2931/0 . first choice 4528/A

2932/0
Polished die-cast aluminium support plate, steel tube foot ø 35mm, chromed, with die-cast zinc bayonet lock, detachable without any tools, can be inserted into plastic mounting underneath the table top for space-saving storage, adjustable plastic gliders, table top HPL or beech veneer. Optional: various edge finishes, table top or edge stained, coated frame, and further options

4sure.
For Everyday Use Without Being Quotidian.

The rounded table top corners are real eyecatchers. For they take up the form of the legs and continue their design. But the self-supporting tables of this linkable system also surprise by their outstanding functionality. In daily use, they are simply more mobile and more flexible, since the individual legs can be mounted or detached with a single movement. This is made possible by the sophisticated construction of the brackets underneath the table tops. They hold the legs with a stable bayonet coupling and also serve for linking the tables in rows, without using tools. Also, no tools are needed when mounting the modesty panels made of web fabric or wood, which further increases functionality.

4sure 2932/0 . first choice 4528/A

- Flexible legs, setting up or dismantling with only one movement
- Legs are mounted by a stable bayonet fitting
- Rounded table tops optional matching the corner nodes
- Linking tables to form rows requires no tools

The Qualities of a Classic.

It is the exceptional visible frame which makes collar so special and which lends any room a very distinctive atmosphere. In a sophisticated interplay of finest leathers or fabrics, frames made of premium solid wood like oak or walnut endow their environment with a warm and natural feeling. In contrast, metal frames with glossy chrome look speak quite a different, avant-garde language. But regardless of the respective combination – thanks to the clear shape, this exclusive programme of upholstered furniture for waiting areas will take its place anywhere, unobtrusive yet with pronounced self-confidence.

- Exclusive upholstered waiting area series sporting a high recognition value.
- Self-confident statement in every room.
- Frame choice of oak wood, American walnut or steel.
- Each variant available in two heights
- Perfect complement of the chair series.

Linear and functional – the elegant solid wood series.

Minimalist and perfectly attuned to the series: in their reduced formal language, the solid beech tables are an ideal complement. There are two variations to choose from. The intelligent design not only looks particularly good, it also accommodates wheelchairs. The table legs tapered on one side emphasise the restrained, light design. The beech veneer, HPL or melamine table top is robust and easy to clean.

Clear and purist design – reduced form is programmatic.

clear combines natural wood with a reduced formal language. In this way the series creates a warm atmosphere and plenty of latitude for design. The 4-legged table with its solid wood frame can be supplied with a choice of table tops with a wood veneer surface or easy-care HPL. This makes these tables a perfect fit for cafeterias, company restaurants and upscale gastronomy.

Harmoniously coordinated or with interesting contrasts: clear always looks good.

6871/8
160 × 80 | 180 × 90 | 200 × 100 cm

A Truly Noble Piece.

The premium design quality is obvious even at first glance. This wooden table excites right away by its shape, material and workmanship. The strikingly oblique angle of its legs and their slightly conical profile with the pronounced outward curvature clearly show the design affinity with seating furniture of the fina wood and fina club series. The apparent contrast between the stable legs and the delicate table top edges deliberately create an unusually exciting look. As well as unexpected stability – for table top and legs are firmly connected by a special metal bracket.

Upon request, the table tops get treated with a special nano-technology finish, resulting in an extravagant, matte lacquer look. On top of this, such a surface is a guarantor of longevity – even when subjected to intense wear and tear. For it is not only resistant to abrasion and light, but also water repellent and easy to clean.

Characteristic unique feature of this table is the specially rounded table top edge made of bevelled MDF – the fina club edge. It brings about this unmistakable lightness of the table tops which – depending on the application purpose – are available in different formats and sizes.

6871
Solid oak wood table legs, stained according to oak standard range, matt lacquer finish, special inserted table top steel fittings, attached with screws, circumferentially bevelled FCK edge, lacquered to match the table top. Optional: oak veneer, stained according to oak standard range, matt lacquered finish and felt giders

Clear design, reduced to the essentials.

Looking all of a piece – that's hoc. The tables are manufactured from three-dimensionally shaped laminated wood parts. For the top layer, there is a choice of oak veneer or white HPL. hoc is available in two heights. The taller version features a noble looking chromed footrest, just like the matching bar stool, highlighting the purist design of this series.

hoc 9171 . 9143

Open to all Sides.

This particularly slender table from the hoc family is the place to meet in discerning cafeterias or bistros, or to hold a quick meeting in the office. Thanks to its triangular shape, it can be used equally well from all sides and can be combined to form organic table formations. These single leg tables have either HPL or oak surfaces.

The hoc bar stools are a harmonious match for the table, both in terms of form and function. From all sides, the chromed steel foot ring offers an optimal place to rest one's feet.

Delicate, yet sturdy: a specifically developed connection bracket integrated into the foot ring provides the table with a high degree of stability.

The modern and easy-to-care moulded wood series for high standards.

As four-legged model or with a central column – the tables of the window family prove compelling thanks to their modern and light shape. The light laminated beech wood has a warm and friendly effect. The HPL table top surface is particularly easy to clean. Lounges, dining rooms, seminar and lecture rooms can be furnished in an inviting and warm way with these tables. They can even easily accommodate a wheelchair.

The stable all-rounder offering good value for money.

The laminated beech wood frame gives the tables a warm and friendly look and feel. The table top surface made of HPL or melamine is easy to clean and robust. The 1600 basic version proves compelling above all because of its optimal value for money.

671
Laminated beech wood frame, rectangular profile, tapered, clear lacquered finish, plastic gliders. Table top surface HPL or beech veneer. Various optional edges, frame, table top or edge stained, and various glider options

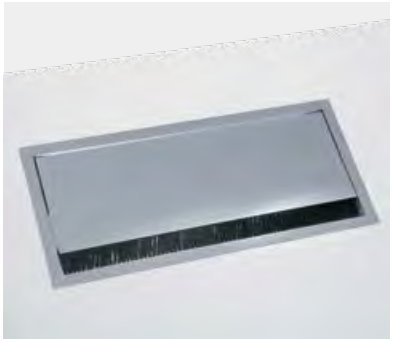
Electrification

General electrification possibilities
Cable management

General electrification options

Covers

suitable for Brunner metal boxes E1001, E1002, E1005, E1006 for models torino, state, spira



E1080
Cover as table duct with push-to-open mechanism
incl. cut-out in the table top
without box or plugs for media integration
opening angle 80°

E1081
Cover for electrification as table duct top as table top
surface as table top **with pull mechanism, manual handling**
incl. cut-out in the table top
without box or plugs for media integration
opening angle 180°
table top: HPL or veneer

E1082
Cover for electrification as table duct
surface as table top
with lift-fitting, with gas pressure spring
incl. cut-out in the table top
without box or plugs for media integration
opening angle 85°
table top: HPL or veneer

Covers

suitable for Brunner profile boxes E2034, E2035, E2039, E2040

E3081
Cover for electrification, opened to one side, as table top outlet, same surface as table top, with brush seal,
including the table top cutout, without box and plugs for media integration, size: 35 × 18cm, opening angle 100°, table top surface: HPL or veneer.

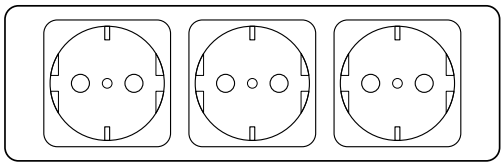
E3070
Cover for electrification, opened to two sides, as table top outlet, steel panel surface, RAL 9006F coating, white aluminium
frame circumferential in RAL 9006F coating, white aluminium, with brush seal including the table top cutout, without box and plugs for media integration, size: 35 × 18cm, opening angle 100°, table top surface: HPL or veneer.

E3080
Cover for electrification, opened to two sides, as table top outlet, same surface as table top, with brush seal,
including the table top cutout, without box and plugs for media integration, size: 35 × 18cm, opening angle 100°, table top surface: HPL or veneer.

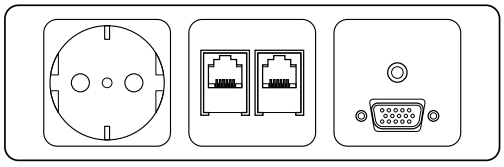
System for easy media integration

suitable for Brunner cable lids E1080, E1081, E1082

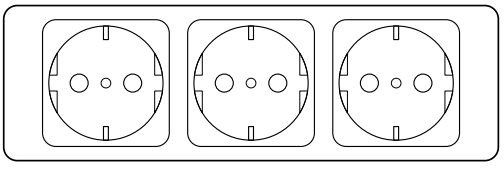
Metal box with plugs for electrification
suitable for Brunner cable lids E1080–E1082
Brunner Metal Box, size: 30 × 22cm, height 8 cm,
lacquered in aluminium colour
Prices of electrification incl. metal box.



Model E1005
Power connection only
For power supply via sockets, without further connections.



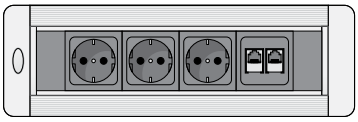
Model E1006
Installation module without signal-control
(1 × 230V, 2 × RJ45 [Cat. 6] 1 × VGA/Audio)
Installation module for passive system inclusion.



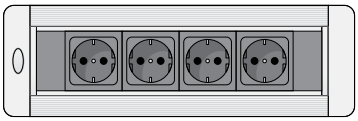
Model E1005 for torino lectern model 9454
Power connection only
For power supply via sockets, without further connections.

Netbox turn Comfort

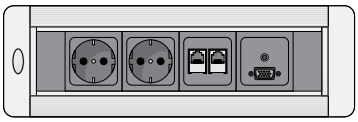
The applicability of the Netbox Turn Comfort has to be requested per table model. *



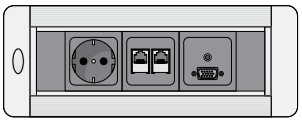
E2834 Netbox Turn Comfort
(module of 4) flush integration of the table top
anodised aluminium, size 32 × 11 cm,
standard configuration: 3 × 230V, 1 × 2 RJ45 (cat. 6)



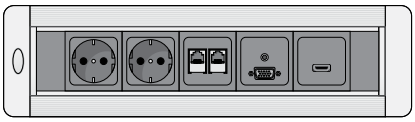
E 2835 Netbox Turn Comfort
(module of 4) flush integration of the table top
anodised aluminium, size 32 × 11 cm,
standard configuration: 4 × 230V



E 2839 Netbox Turn Comfort
(module of 4) flush integration of the table top
anodised aluminium, size 32 × 11 cm,
standard configuration: 2 × 230V, 1 × 2 RJ45 (cat.6),
1 × VGA/Audio



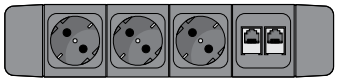
E 2838 Netbox Turn Comfort
(module of 3) flush integration of the table top
anodised aluminium, size 27 × 11 cm,
standard configuration: 1 × 230V, 1 × 2 RJ45 (cat. 6),
1 × VGA/Audio



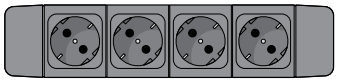
E 2850 Netbox Turn Comofrt (module of 5)
flush integration of the table top
anodised aluminium, size 37 × 11 cm,
standard configuration: 2 × 230V, 1 × 2 RJ45 (cat. 6),
1 × VGA/Audio, 1 × HDMI

Profile boxes

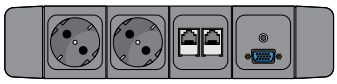
Profile box suitable for fina conference and fina flex models, suitable for cable covers E3070, E3080 and E3081



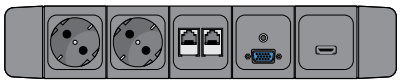
E2034
profile box (module of 4)
black plastic, dimension 278 × 62 mm
positioned in the cable channel fina conference or fina flex
standard configuration: 3 × 230V, 1 × 2 RJ45 (cat.6)



E2035
profile box (module of 4)
black plastic, dimension 278 × 62 mm
positioned in the cable channel fina conference or fina flex
standard configuration: 4 × 230V



E2039
profile box (module of 4)
black plastic, dimension 278 × 62 mm
positioned in the cable channel fina conference or fina flex
standard configuration: 2 × 230V, 1 × 2 RJ45 (cat. 6),
1 × VGA/Audio



E2040
Profilbox (module of 5)
black plastic, dimension 331 × 62 mm
positioned in the cable channel fina conference or fina flex
standard configuration: 2 × 230V, 1 × 2 RJ 45 (cat. 6),
1 × VGA/Audio, 1 × HDMI

*This technical clarification is necessary to determine the position of the cut-outs in the table frame and mounting plate as well as to maintain the functionality (e.g. folding) and stability of the table. The exact positioning of the Netbox has to be determined with the help of dimensioned drawings.

Cable routing

Cable channel

2841
Cable channel for convenient fold-down, central position and cable routing underneath the table top, also appropriate for larger cable quantities.

Cable duct fina conference
Cable duct adaptable to the respective table format, easy fold-down, can accommodate many cables, black anodised aluminium. The cable duct can be mounted without tools; retrofitting is no problem.

torino . E1085
Vertical cable routing, shiny chrome, finish clip-on guide rail attached to the table leg, incl. preparation of the table legs (to be ordered separately).

E1090
Horizontal cable channel made of flexible mesh material for table lengths of up to 200cm, for routing cables and profile boxes.

E1091
Cable rail for table legs, vertical cable duct, aluminium, glossy chromed, magnetic attachment.

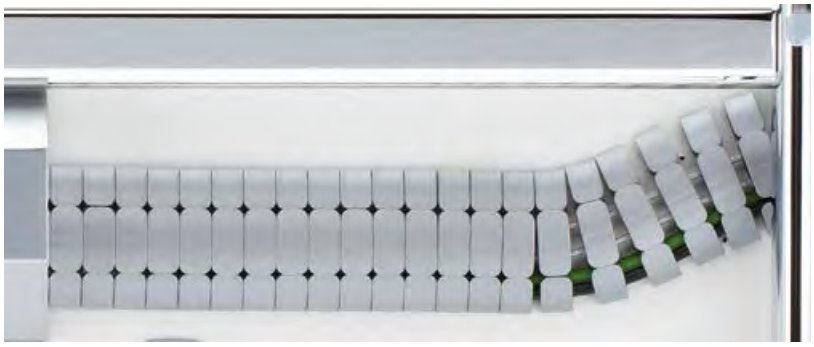
spira . 2705
Cable duct in the table column spira, steel base plate, coated RAL 9007F, with cut-out, chromed cover, chromed column with cut-out for cable routing, raised gliders for cable routing
Table height changes to 75 cm (available upon request).

E1092
Cable channel, foldable to both sides, detachable without tools, aluminium, anodised black, suitable for use with profile boxes E2034, E2035, E2039 and E2040.

Intelligent accessories ensure safety and tidiness.

Modern conference technology assumes a high degree of electrification. In order to avoid cable chaos, which would spoil the visual impression and could turn into a safety risk, we developed the corresponding accessories for our tables. With cable clips and cable channels all cables can be cleanly and safely tucked away.

Link chain cable guide



E 1087
Plastic, flexible cable routing,
larger cable quantities,
length to be ordered as required,
adaptable for all table formats.

Cable clip

2833
Cable clip black plastic
For cable routing below
the table.

fina conference . E1089
Cable clip black plastic
For tool-free assembly to
the rectangular cross brace
below the table top
Can take up to 4 cables.

state . 2843

Cable guide – intelligent, simple and flexible to handle.

Intelligent cable management does not stop at the table top but also guides the cables down the table leg in an organised way. For this purpose there is a cable screen which can be simply mounted on the table leg without tools. In this way the cable management can also easily be adapted to changing table configurations.

Clip-on guide rail for state

state . 2843
Clip-on guide rail for cables attached to the table leg, aluminium, anodised or shiny chrome finish.

Cable routing

2733
Vertical cable routing
Plastic silver RAL 9006.

E 1086 Fabric tube for cables
Can also be used with other tables.

fina flex, fina conference E 1091
Vertical cable routing
with magnetic fixing,
with larger cut out for routing more cablesn.

Folding mechanisms

basic

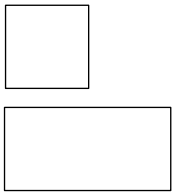
get.up

sleight

High-quality fittings, non-wearing and simple to operate.

Our high-quality and maintenance-free fittings are the basis for a user friendly and smoothly functioning folding mechanism. Even after repeated folding up and folding down they do not lose any of their functionality. At the same time they ensure that once the tables have been set up, they are always stable under load. The special feature of sleight: the intelligent design hides its outstanding functionality. The folding fitting has been patented. With get.up the fitting was specially developed for 4-legged tables with horizontal strut. Cross struts are not necessary, giving ideal legroom at the head end. basic is equipped with the new STS stability system. The folding mechanism with diagonal bar and 3-point mounting ensures maximum stability and sturdiness.

Intermediate tops



2001 . 2246/0

2246/2

2004 . 2246/4

2246/3

Individual table configurations – always new and always different.

Intermediate tops have two key benefits. Changing the table top can be done in a fast, simple and safe way. In addition, numerous table top sizes and shapes make it possible to assemble the optimum table configuration. Inserts therefore represent a cost-effective addition to a table system.

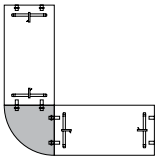
EHV1
Universal fitting for all table tops
with a thickness of 30 mm.

EHV2
Keyhole insert device,
for table tops
with edges ABS 70, MK 70.



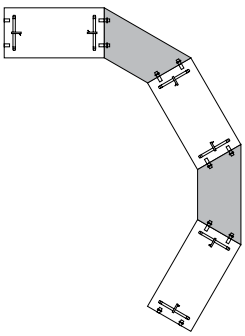


Table Connecting systems

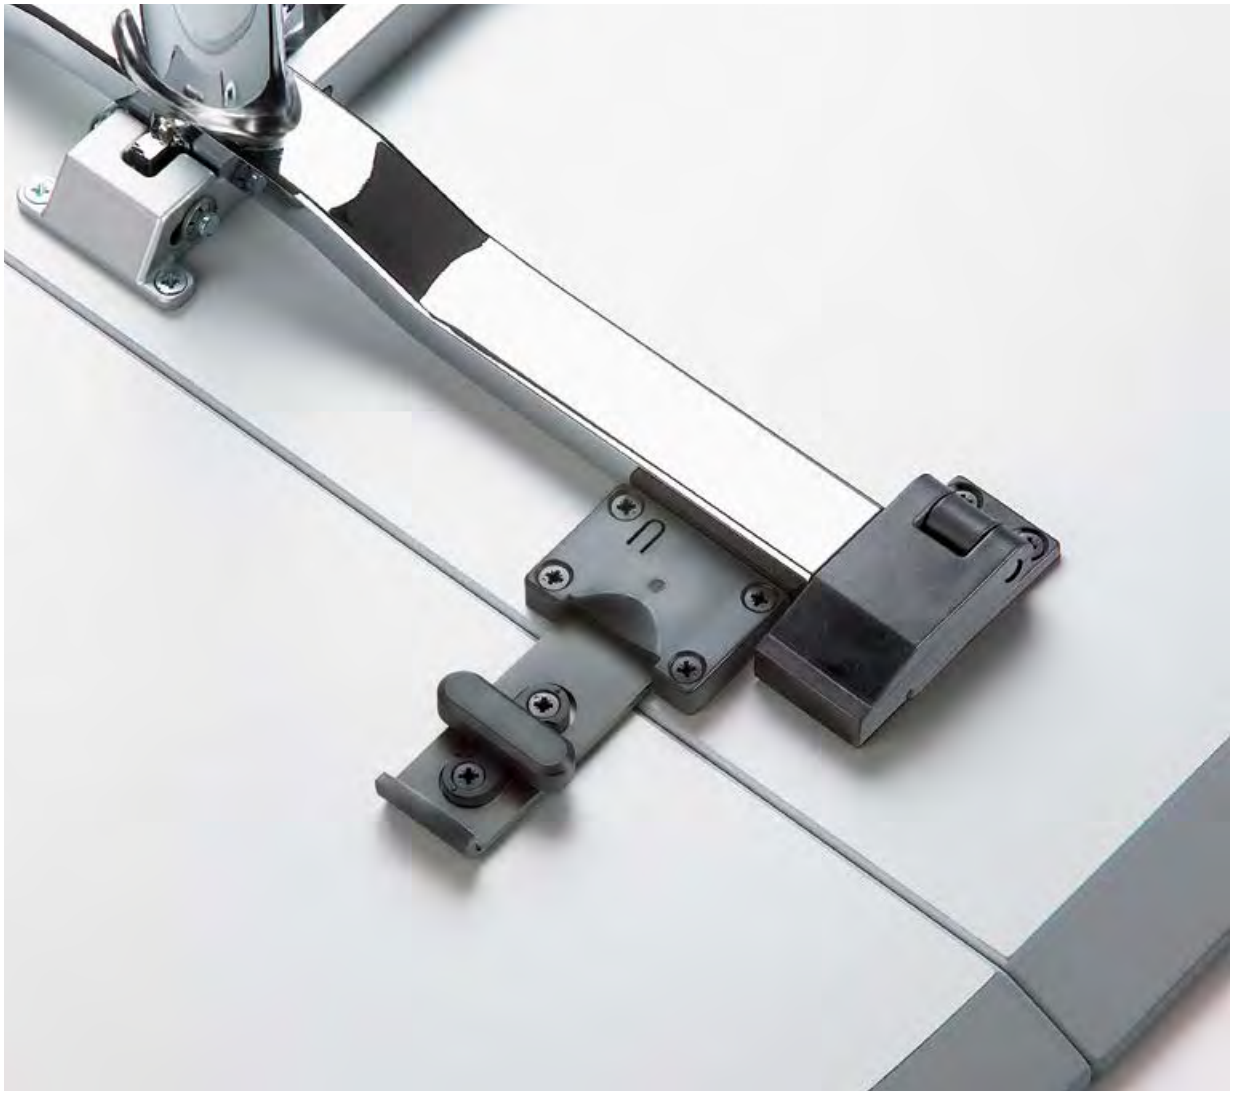

TV1 universal fitting

Always a good and stable connection.

Connecting elements are used to connect tables in a row. We offer different solutions for individual requirements. The universal fitting TV1 for all table tops with a thickness of 30 mm is particularly innovative. The connecting system works in a simple and safe way. The connecting elements can be inserted almost invisibly.

TV1

TV2

TV1 table connector for all table tops with a thickness of 30 mm except for trust.

TV2 table connector with locking bar, for models trust 2237, 2247, 2248 and get.up 2240.

TV3

TV3

TV3 table connector for all basic series models consisting of a lug and its counterpart, mounted to the frame's pivot bearing, mounted alternately.

TV3E

TV4

TV3E table connector for rectangular tables from the basic series, length 170 cm or longer, as well as all basic tables with indented frames, consisting of a lug and its counterpart, lug mounted to separate mounting block, mounted alternately.

TV4 table connector for models 6051.

TV6

TV7

TV6 table connector
Plastic fastener for alternately connecting 4last table models.

TV7 table connector
Plastic fastener for alternately connecting 4less and 4sure table models.

Modesty panels

sleight 2245/0 . 2208NL . milanolight 5226

Discrete and tidy – modesty panels provide visual order.

Leg space can be discretely shielded with various modesty panels. Modesty panels ensure protection, discretion and support the tranquility of the overall impression. We offer modesty panels of various thicknesses, heights and materials. The connecting elements or fittings depend on the individual requirements.

Assembly

Mounting fitting for panel

Models

Modesty panel 2207
Panel 20 mm thick, height 40 cm, HPL-coated on both sides, ABS or BK edge.
Optional beech veneer. Modesty panel suitable for basic, sleight, and cross 3071

Modesty panel 2208N
10 mm MDF panel, height 40 cm, HPL-coated on both sides, without additional edge bands, edge slightly chamfered, edge clear lacquered finish, screws unvisible.
Optional beech veneer.
Modesty panel suitable for basic, sleight and cross 3071

Modesty panel 2208NL
10 mm MDF panel with perforation, height 40 cm, HPL-coated on both sides, without additional edge bands, edge slightly chamfered, edge clear lacquered finish, screws unvisible.
Optional beech veneer.
Modesty panel suitable for basic, sleight and cross 3071

Modesty panel 9409N
Panel MDF, 10 mm thick, height 32 cm, HPL-coated on both sides, without additional edge band, edge slightly chamfered, edge lacquered to match surface.
Optional beech veneer.
Modesty panel suitable for torino

Modesty panel 9409NL
Panel MDF, 10 mm thick, height 32 cm, with perforation, HPL-coated on both sides, without additional edge band, edge slightly chamfered, edge lacquered to match surface.
Optional beech veneer.
Modesty panel suitable for torino

Modesty panel 2205N
Panel MDF, 10 mm thick, height 40 cm, HPL-coated on both sides, without additional edge band, edge slightly chamfered, edge lacquered to match surface.
Optional beech veneer.
Modesty panel suitable for trust

Modesty panel 2205NL
Panel MDF, 10 mm thick, height 40 cm, with perforation, HPL-coated on both sides, without additional edge band, edge slightly chamfered, edge lacquered to match surface.
Optional beech veneer.
Modesty panel suitable for trust

Modesty panel 2206
Panel MDF, 16 mm thick, height 40 cm, HPL-coated on both sides, veneer edge band 2 mm, transverse edges 4 mm, top and bottom straight, lateral edges chamfered with MDF visible.
Optional beech veneer or oak veneer, stained, matt lacquered finish. Modesty panel suitable for state

Modesty panel 2206L
Panel MDF, 16 mm thick, height 40 cm, with perforation, HPL-coated on both sides, veneer edge band 2 mm, transverse edges 4 mm, top and bottom straight, lateral edges chamfered with MDF visible.
Optional beech veneer or oak veneer, stained, matt lacquered finish. Modesty panel suitable for state

Mesh panel 2902
Flat steel tube frame, completely covered with mesh fabric, runner black, panel matching series 4last/4less/4sure

Wooden panel 2901
Both sides HPL coated, without additional edge band, edge slightly refracted, edge lacquer finish matching the surface, panel matching series 4last/4less/4sure

Storage and transport systems

1003PIR . pivot

Easy transport, space-saving storage.

Thanks to intelligent solutions, even large tables can be easily handled and stored to save space. Model 1003 is the universal table cart, for transporting and storing tables of up to 180 cm in length. In addition, we offer separate carts for special requirements: 1003RN for round tables, 1003PIR for tables from the pivot series, e.g. in hotels. And for the state series, model 1003ST has been specially developed; just like table top trolley 1003FF and leg trolley 1007FF for the fina flex series.

Selection

For the complete programme, please refer to the decor card

Real wood veneers

E1100
Maple (European), matt lacquered finish

E1500
Oak, stained light, matt lacquered finish

E3700
Walnut (American), matt lacquered finish

E3600
Oak, stained in wenge colour, matt lacquered finish

E5500
Oak, stained anthracite, matt lacquered finish

E5099
Oak, stained black, matt lacquered finish

Maple (European):
light, friendly wood.

Oak:
open-pored, structured wood with matt surface, stained according to the Brunner oak standard range.

Walnut (American):
luxurious surface, strong, lively structure, varies in structure and colour. All veneers are coordinated with the wood of the chairs.

Find more colours in our product portfolio.

Beechwood stains

B2100
Beech, clear lacquered finish

B1100
Maple 2, stained

B1500
Stained light walnut

B3500
Wenge, stained

Beech
is our standard material and offers a firm, closed surface. The wood is ideally suited for staining to achieve individual colourings.

Find more colours in our product portfolio.

HPL laminates

U 036 Mid grey

F 37/023 Bloomed beech

R 4223 Lindberg oak

R 5447 After eight maple

Highly compressed laminate.
Laminates are available in various colours and structures. Particularly resistant against scratching and dirt.

Find more colours in our product portfolio.

Glass

Toughened safety glass (ESG)

ESG
Satined toughened safety glass (ESG) is ideally suited for furnishing modern architecture. The closed surface is easy to clean and particularly hygienic.

Any deviation in colour is due to the printing process

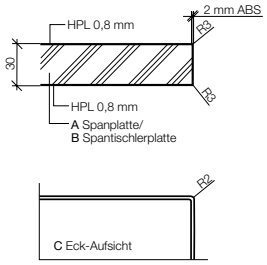
ABS 40

Edges for special models

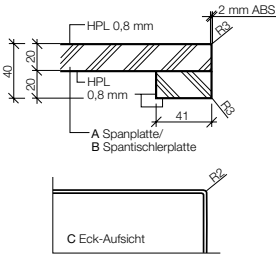
CRK

APK



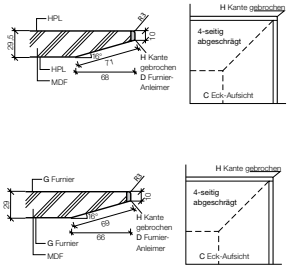
Standard edge made of impact resistant plastic (ABS)
Extremely robust edge finish for heavy duty as in large capacity areas. Table top 30 mm thick, 2 mm ABS edge band, slightly rounded at the top and bottom, radius 3 mm

Also available as ABS 20

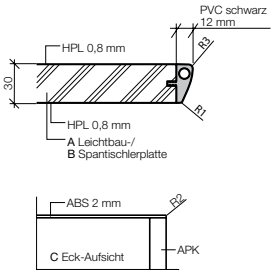


As ABS 30 but with reinforcement at the edge
Table top 20 mm thick and 40 mm reinforcement ath the edge, 2 mm ABS edge band, slightly rounded at the top and bottom, radius 3 mm

Also available as ABS 70



High-quality, circumferentially bevelled edge
Table top 30 mm thick, made of MDF, bevelled downwards by 16° of all 4 sides on a width of 69 mm, the remaining edge of 10 mm has on all sides a Beech/oak or walnut edge band



Durable Air-Protection edge
Internal air chamber, elastic plastic (free of formaldehyd and completely recyclable), impact resistant, scratch resistant, appealing design

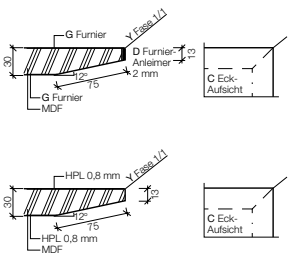
Edges for special models

MEM

MKB

Trespa board

state



High-quality bevelled edge, filigree side view, MDF table top
For high quality conference rooms. Table top 30 mm thick, made of MDF, bevelled by 12° at the bottom of all 4 sides on a width of 75 mm, the remaining edge of 13 mm has on all 4 sides an edge band

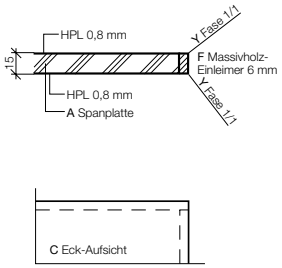


Table top 15 mm thin with beech edge
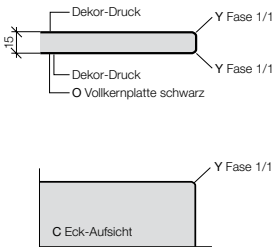
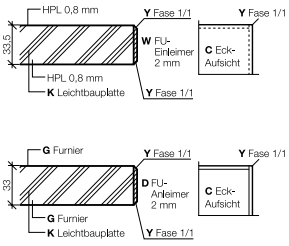
Filigree table top 15 mm thick, edge slightly refracted, chamfer 1/1. HPL: solid beech wood concealed edge band. Veneer: solid beech wood edge band



Laminated board
only available in pastel grey, 13mm thick, UV- and weather-resistant, black core, chamfered edge



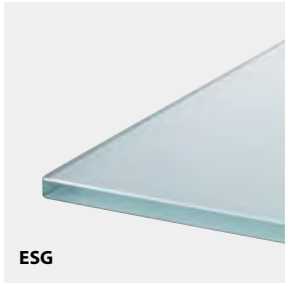
Recommended for the use in conference areas
Lightweight table top 32 mm (with 4 mm chipboard cover per side) HPL: veneer concealed edge band 2 mm thick, both sides laminated in HPL. Veneer: veneer edge band 2 mm thick, both sides laminated in veneer as per choice. Edge chamfered 1 ×1 mm, corners chamfered 1 × 1 mm, cut-out underneath the top for table legs

Edges for special models

SKM

BKR

MKE



ESG

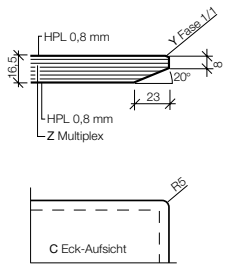


Table top completely in multiplex, high-quality, filigree impression
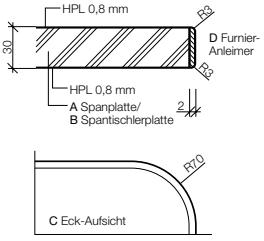
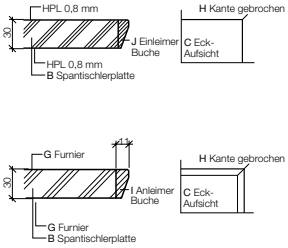
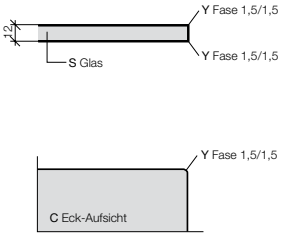
goes perfectly with chairs laminated in HPL. Table top 15 mm beech multiplex, (with screw-down plate multiplex 300 × 300 × 12 mm). Table top in HPL or beech veneer, without any additional edge band, edge bevelled downwards, corner radius 5 mm (square tops), clear lacquered



Straight beech edge with rounded corners
Table top 30 mm thick, corner radius 70 mm. HPL: beech veneer edge band, at top and bottom radius 3 mm, corner radius 70 mm. Veneer: beech veneer edge band 30/2 mm, slightly rounded at top and bottom radius 3 mm



Beech edge, bevelled downwards at all sides
Table top 30 mm thick, HPL: solid beech wood concealed edge band 28/11 mm mitred, bevelled downwards. Veneer: solid beech wood edge band 30/11 mm mitred, bevelled downwards



Safety glass
Toughened glass, satined at one side, 12 mm thick. Polished edges, slightly rounded at the corners (radius approx. 3 mm), edge slightly refracted, chamfer 1,5/1,5

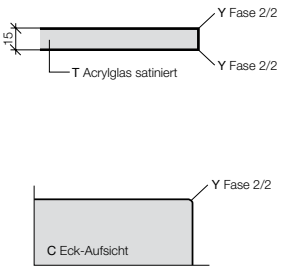
Edges for special models

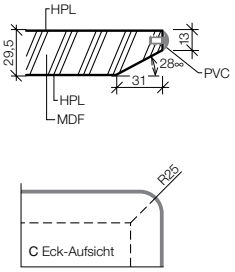
Acrylic

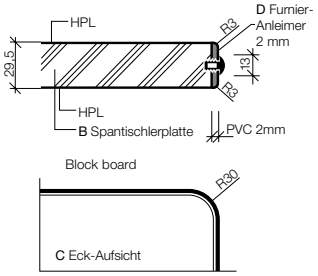
KS

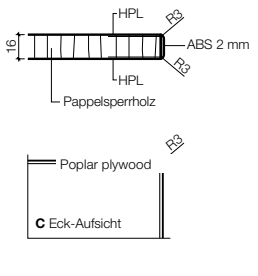
BKP

slimlight









Acrylic glass, satined
Synthetic top made of acrylic glass, 15 mm thick, polar white satined. Edges polished, corners rounded with radius 30 mm, edge slightly refracted, chamfer 2/2

KS bevelled edge – rubber profile, black, for heavy-duty usage
Table top 30 mm, supporting material MDF. Edge on all 4 sides on a width of 31 mm bevelled to 28°, remaining edge of 13 mm with rubber edge profile black. Edge radius R25 mm

Blockboard top, 28 mm thick
With HPL on both sides 0,8 mm, beech veneer edge band 2 mm, slightly rounded at the top and bottom, radius 3 mm, with additional edge protecting profile in 14/093 black, corner radius 30 mm

Very light, thin table top with a thickness of 16 mm of poplar plywood
With HPL on both sides or veneer, veneer edge band 2 mm, clear lacquered or ABS edge, 2 mm according to standard range

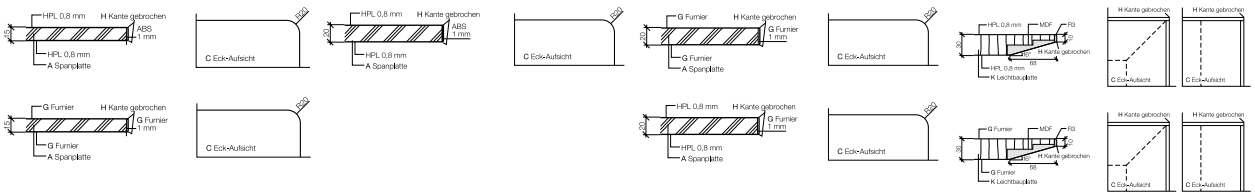
ABS 20 flow

BK 20 flow

CRKL



Plastic edge with rounded corners matching frame of table series 4
Extremely robust edge finish of impact-resistant 1mm thick plastic in black or white, table top with HPL and rounded corners R 20

Plastic edge with rounded corners matching frame of table series 4
Extremely robust edge finish of impact-resistant 1mm thick plastic in black or white, table top with HPL and rounded corners R 20

Also available as ABS 30 flow

Veneer edge with rounded corners matching frame of table series 4
Edge finish with a 1mm thick veneer edge band, table top with veneer surface and rounded corners R 20

Also available as BK 30 flow

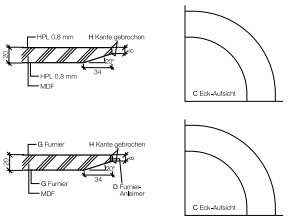
High-quality, circumferentially bevelled edge with lightweight top
High-quality table top, 30mm thick, leightweight with HPL and bevelled CRKL edge, with a concealed edge band of MDF material on the bottom side, depending on table model on the long sides, one short side or circumferential, bevelled to 10 mm. Alternatively with veneer surface

Edges for special models

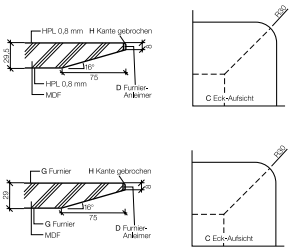
JLK

FCK

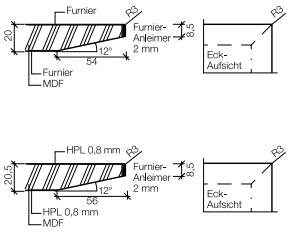
BKS



Circumferentially bevelled edge
Table top in 20 mm MDF in different sizes and shapes, laminated with HPL, on the bottom side 35 mm circumferential beveled to 8 mm. Or alternatively with veneer surface and veneer edge



High-quality, circumferentially bevelled edge with rounded corners
High-quality table top with rounded corners R 30, table top 30 mm in MDF, with HPL, with a 1 mm thick veneer edge band, 75 mm circumferential, bevelled to a thickness of 10 mm. Or with veneer surface



High-quality, circumferentially bevelled edge
Table top in 19 mm MDF, laminated with HPL, beech veneer edge band 2 mm, slightly rounded at the top R 3 mm, 8,5 mm straight, then bevelled downwards on 4 sides. Alternatively also with oak veneer and oak veneer edge band

Notes

See the current price list for details, prices and terms of business.
We reserve the right for technical changes, errors and colour variations.
Some of the models depicted are special versions that are subject to additional costs.

Wood is a natural product. For our furniture series, we exclusively use high-quality beech wood from sustainable forestry sources. Despite careful selection of the wood, there may be variations in colour. Differences in colour and structure do not constitute a reason for complaint but are rather a manifestation of the individual character of wooden furniture. For the real wood table tops of beech veneer tables, so-called sliced veneers are used that are generally of a slightly different colour than solid wood, which is used for the table legs. We therefore recommend stained table tops, edges and legs.
