BRUNNER x NEW WORK

A revolution in sitting: Work 4.0

Let's journey into the future of the working world together.

Conventional working structures are no more, power structures are being eliminated and a balance has been struck between work and life. People are talking about "New Work", a work model that focuses on agility, self-determinism and employee satisfaction. In addition to work methods, workspaces are also being redefined.

MAKE ROOM FOR THE FUTURE.

Room for agile and flexible collaboration, transparent exchanges as well as for quiet areas. It is all part of the New Work ecosystem.

WORKING WITH THE FUTURE IN MIND.

Our New Work products provide the perfect creative solution to various challenges. Customisable furniture, mobile presentation options and cosy quiet zones. No need to time travel to find a future working space – we have all the ingredients right here, right now.

team.

jehs+laub

Team works.

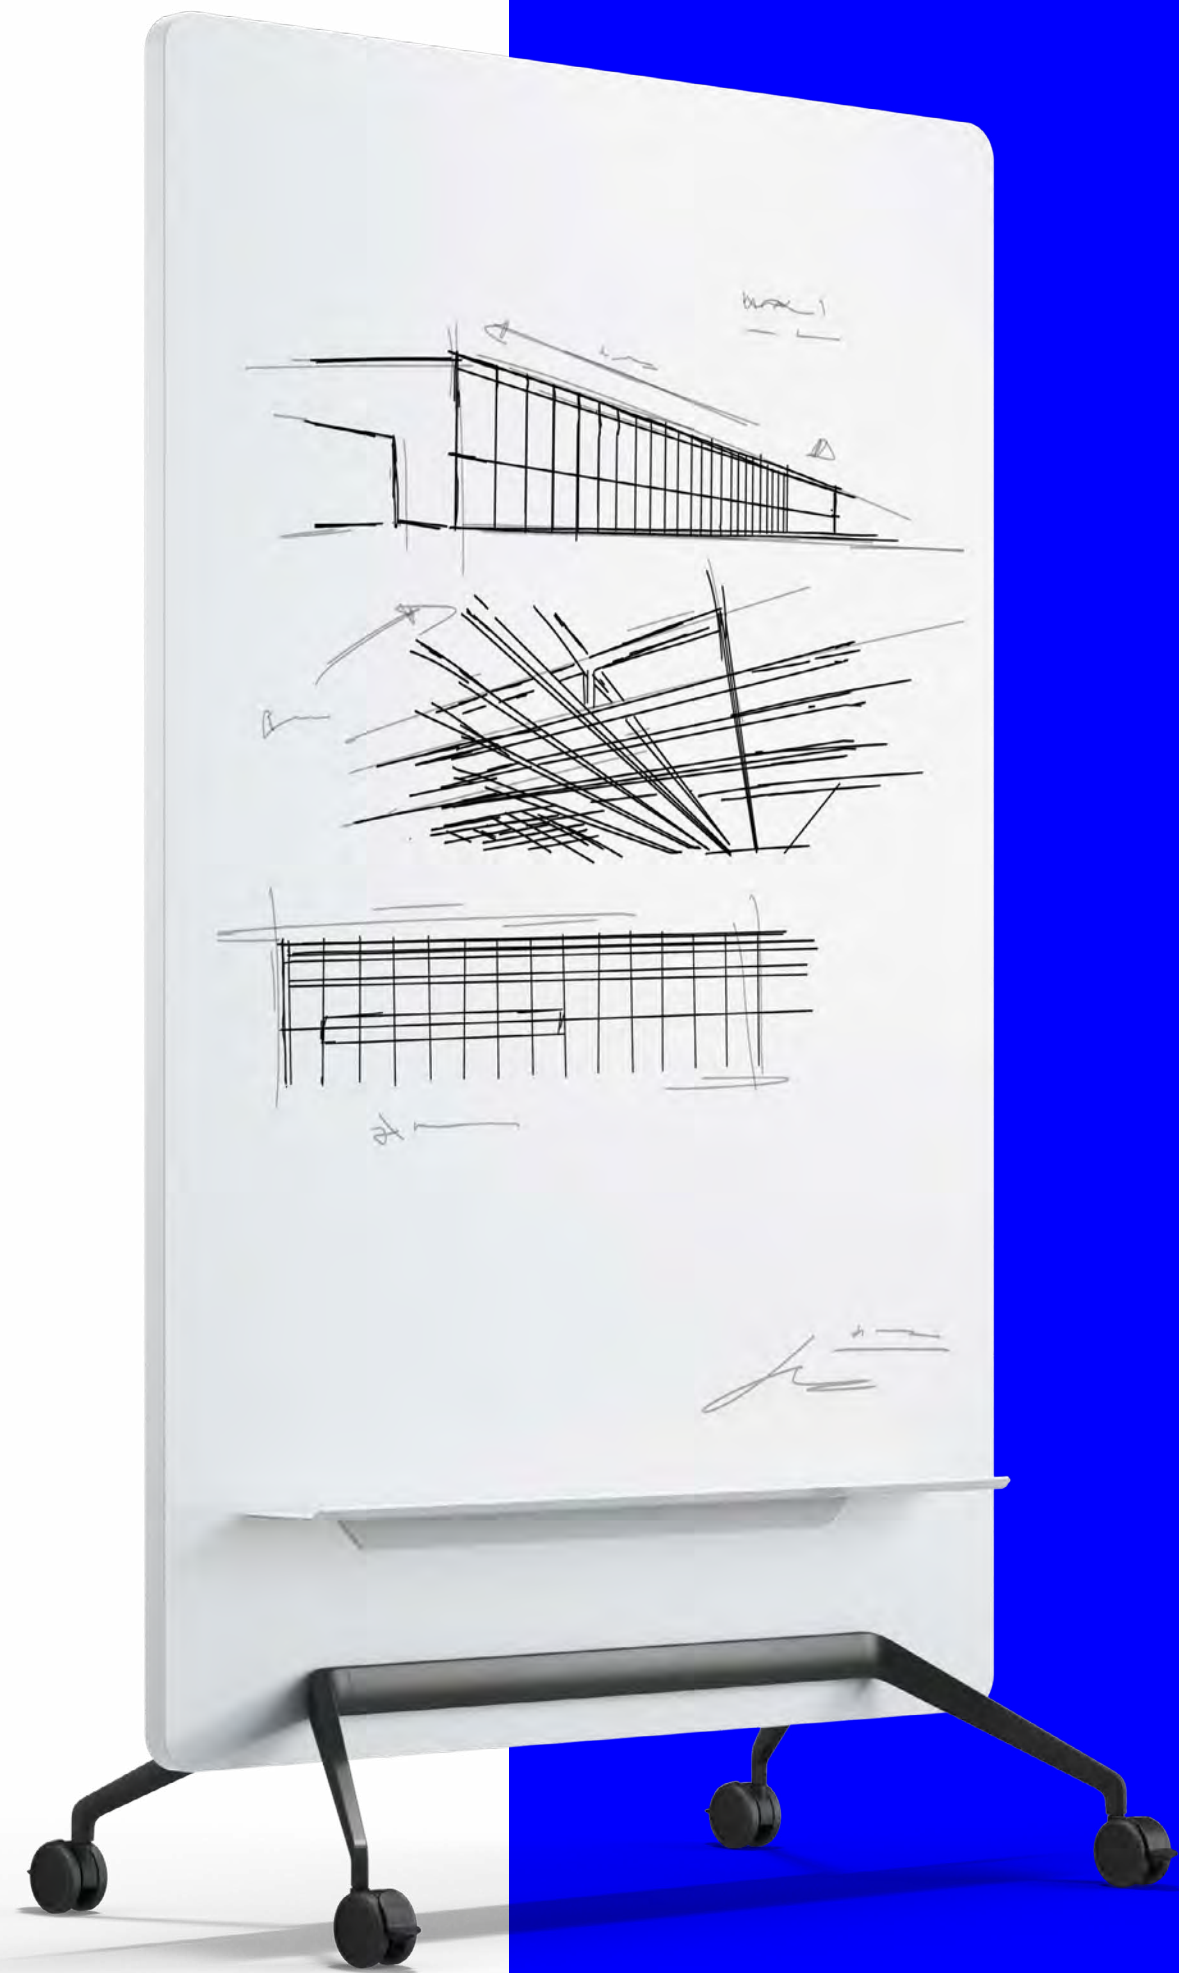

The way to get ideas rolling.

Like the mobile partition system, the team table is also indispensable. Available in various sizes, with castors on the table legs, and with an extra tablet for the standing table, it creates a mobile, flexible feel. Always ready for use in co-working spaces and project offices.

To separate rooms
and expand horizons.

Ideas take
shape here.

**We create
work spaces.**

lift.
jehs+laub

**Just a matter of
the right setting.**

Always at your level.

Ensuring everyone is at the same level when co-working, too. The height-adjustable tables combine flexible working with a modern design.

A-Chair

jehs+laub

Comfort is always
within arm's reach.

Your elbows will not get in the way with this chair. With the plastic armrests integrated into its frame, the A-chair knows how to please when it comes to comfort. And you can even sit one on top of the other. Or 15. Since the A-chair is just so easy to stack.

brunner ::

**Gets things sorted:
the A-chair.**

**An elegant
appearance, even
behind the scenes.**

4more

LSS Designer / Roland Schmidt

One for all,
and all in one.

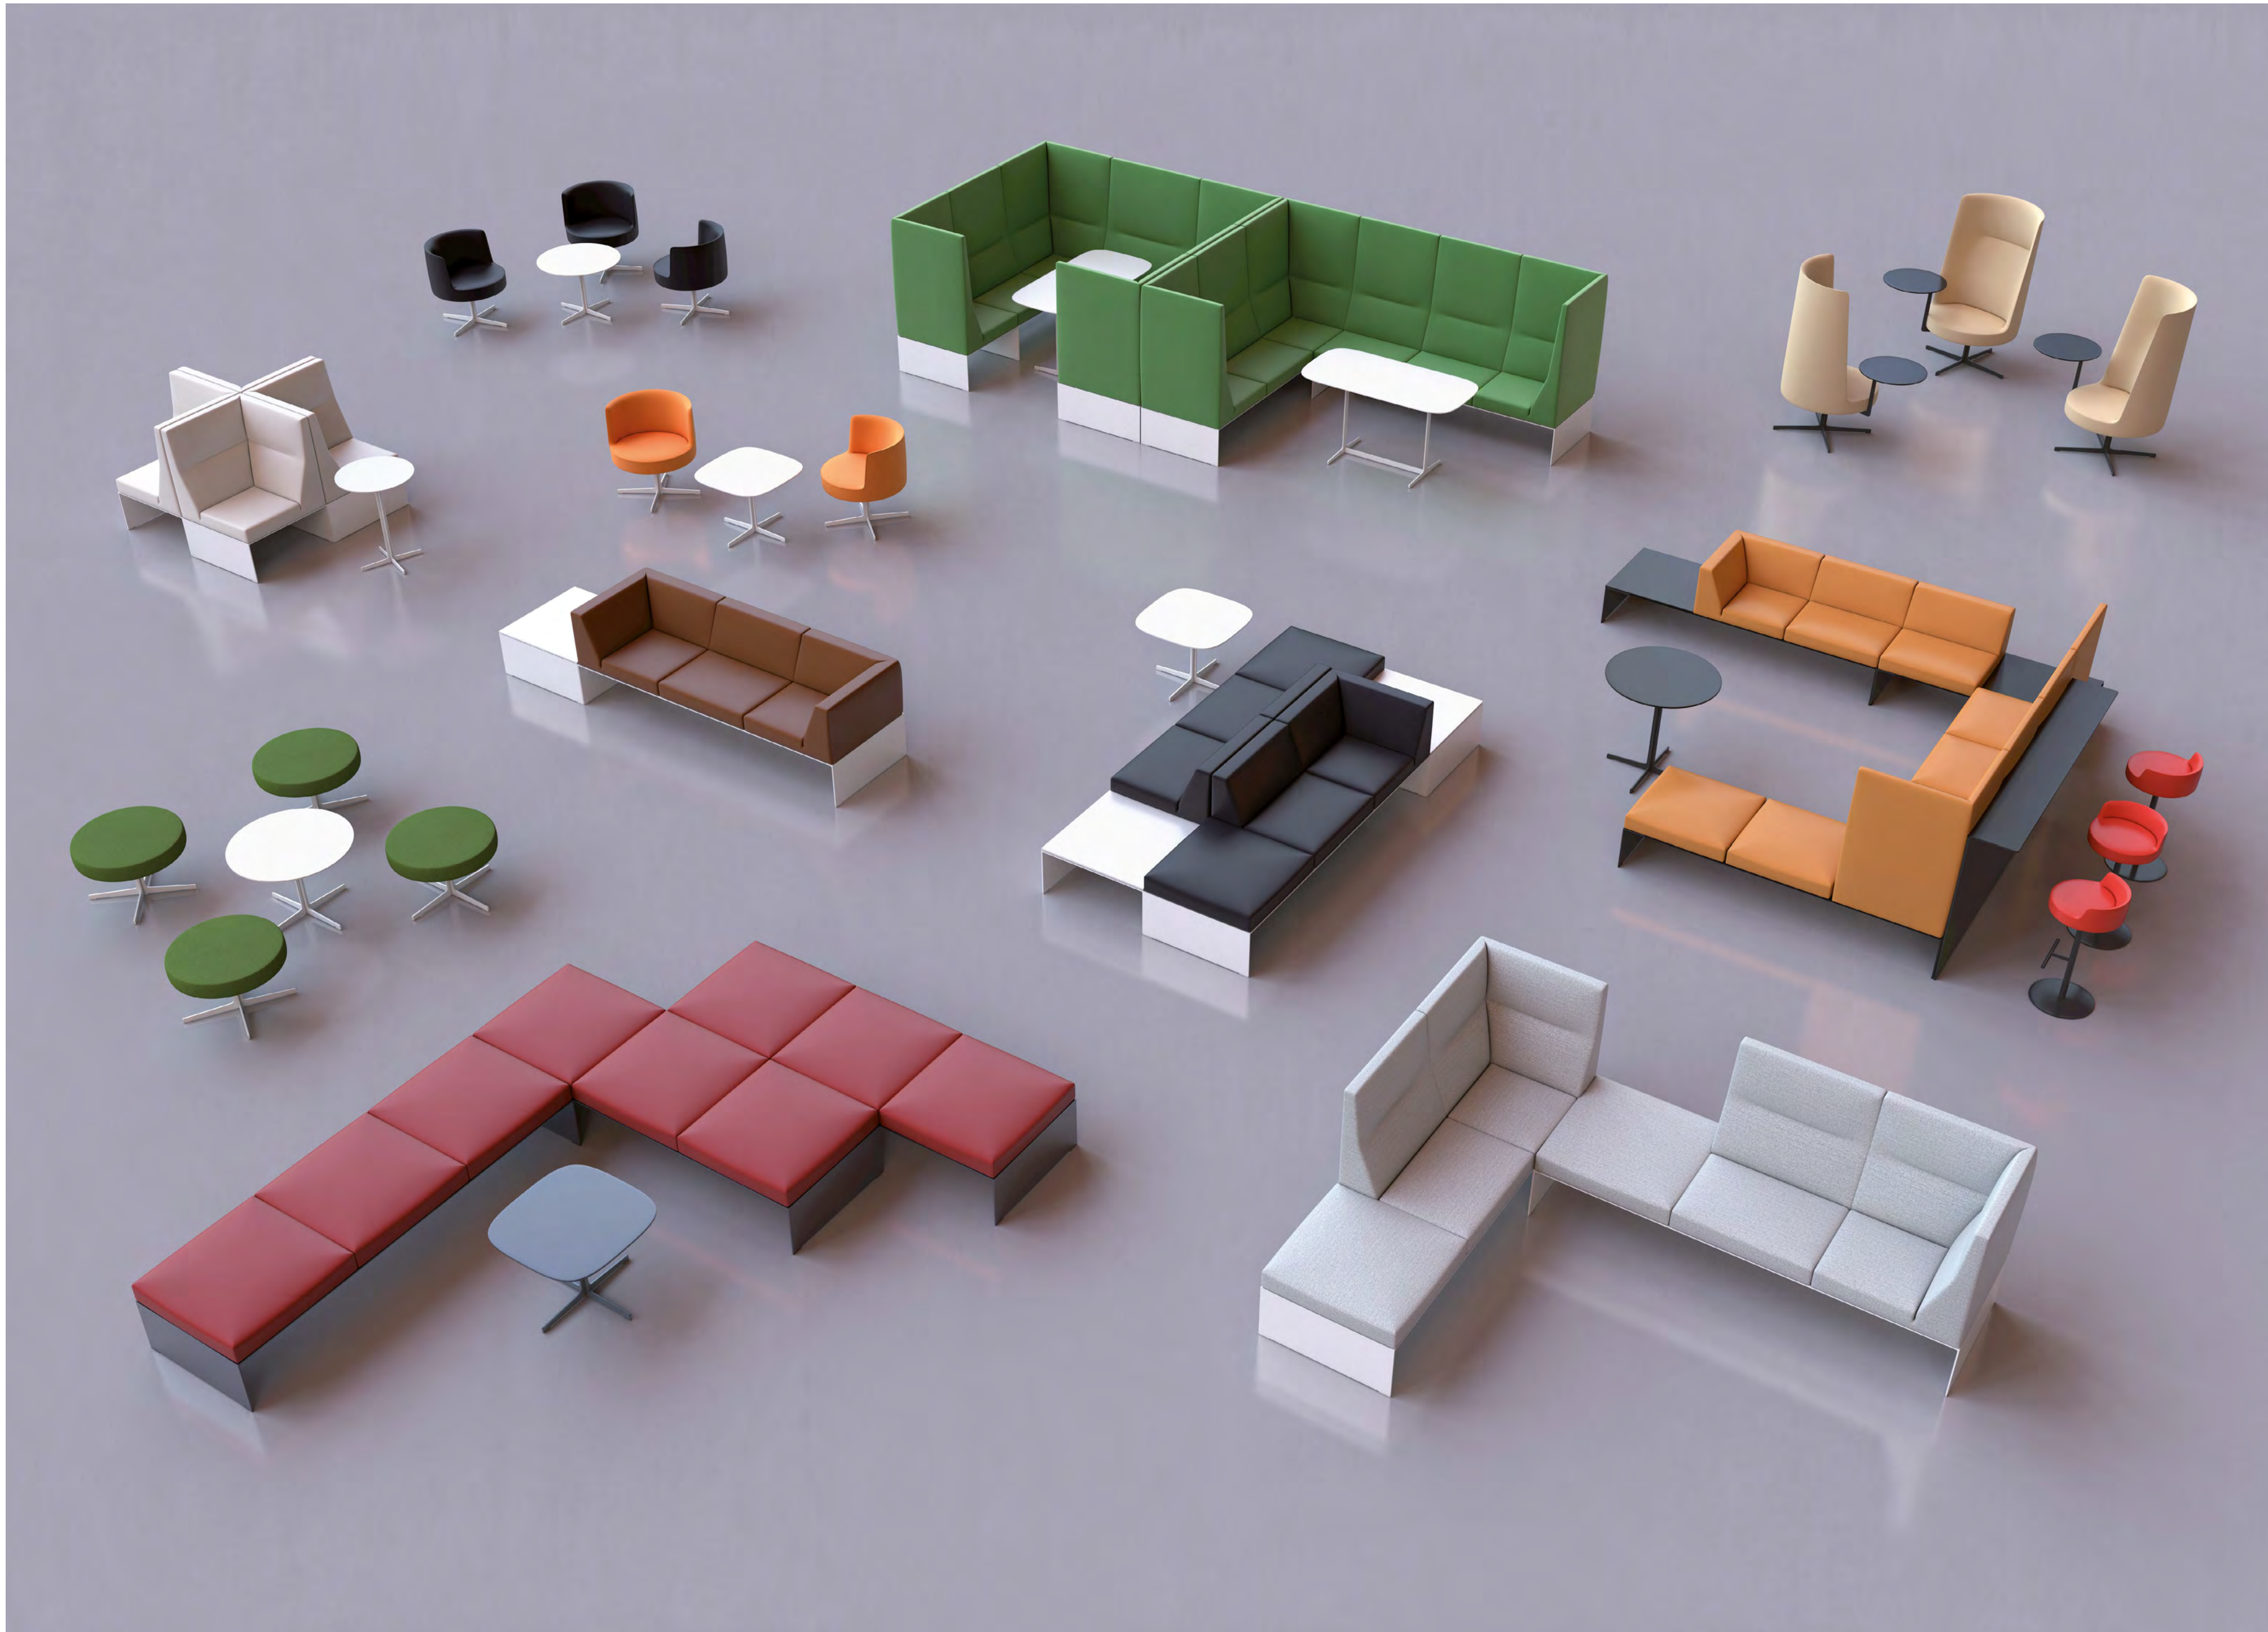

It's actually a shame that you can barely even see its best parts. For the thin, virtually invisible traverse under-frame and the innovative folding mechanism stay hidden under the slimline tabletop and you would never suspect that it was actually a folding table

**Slender and functional?
Folds like a charm!**

banc

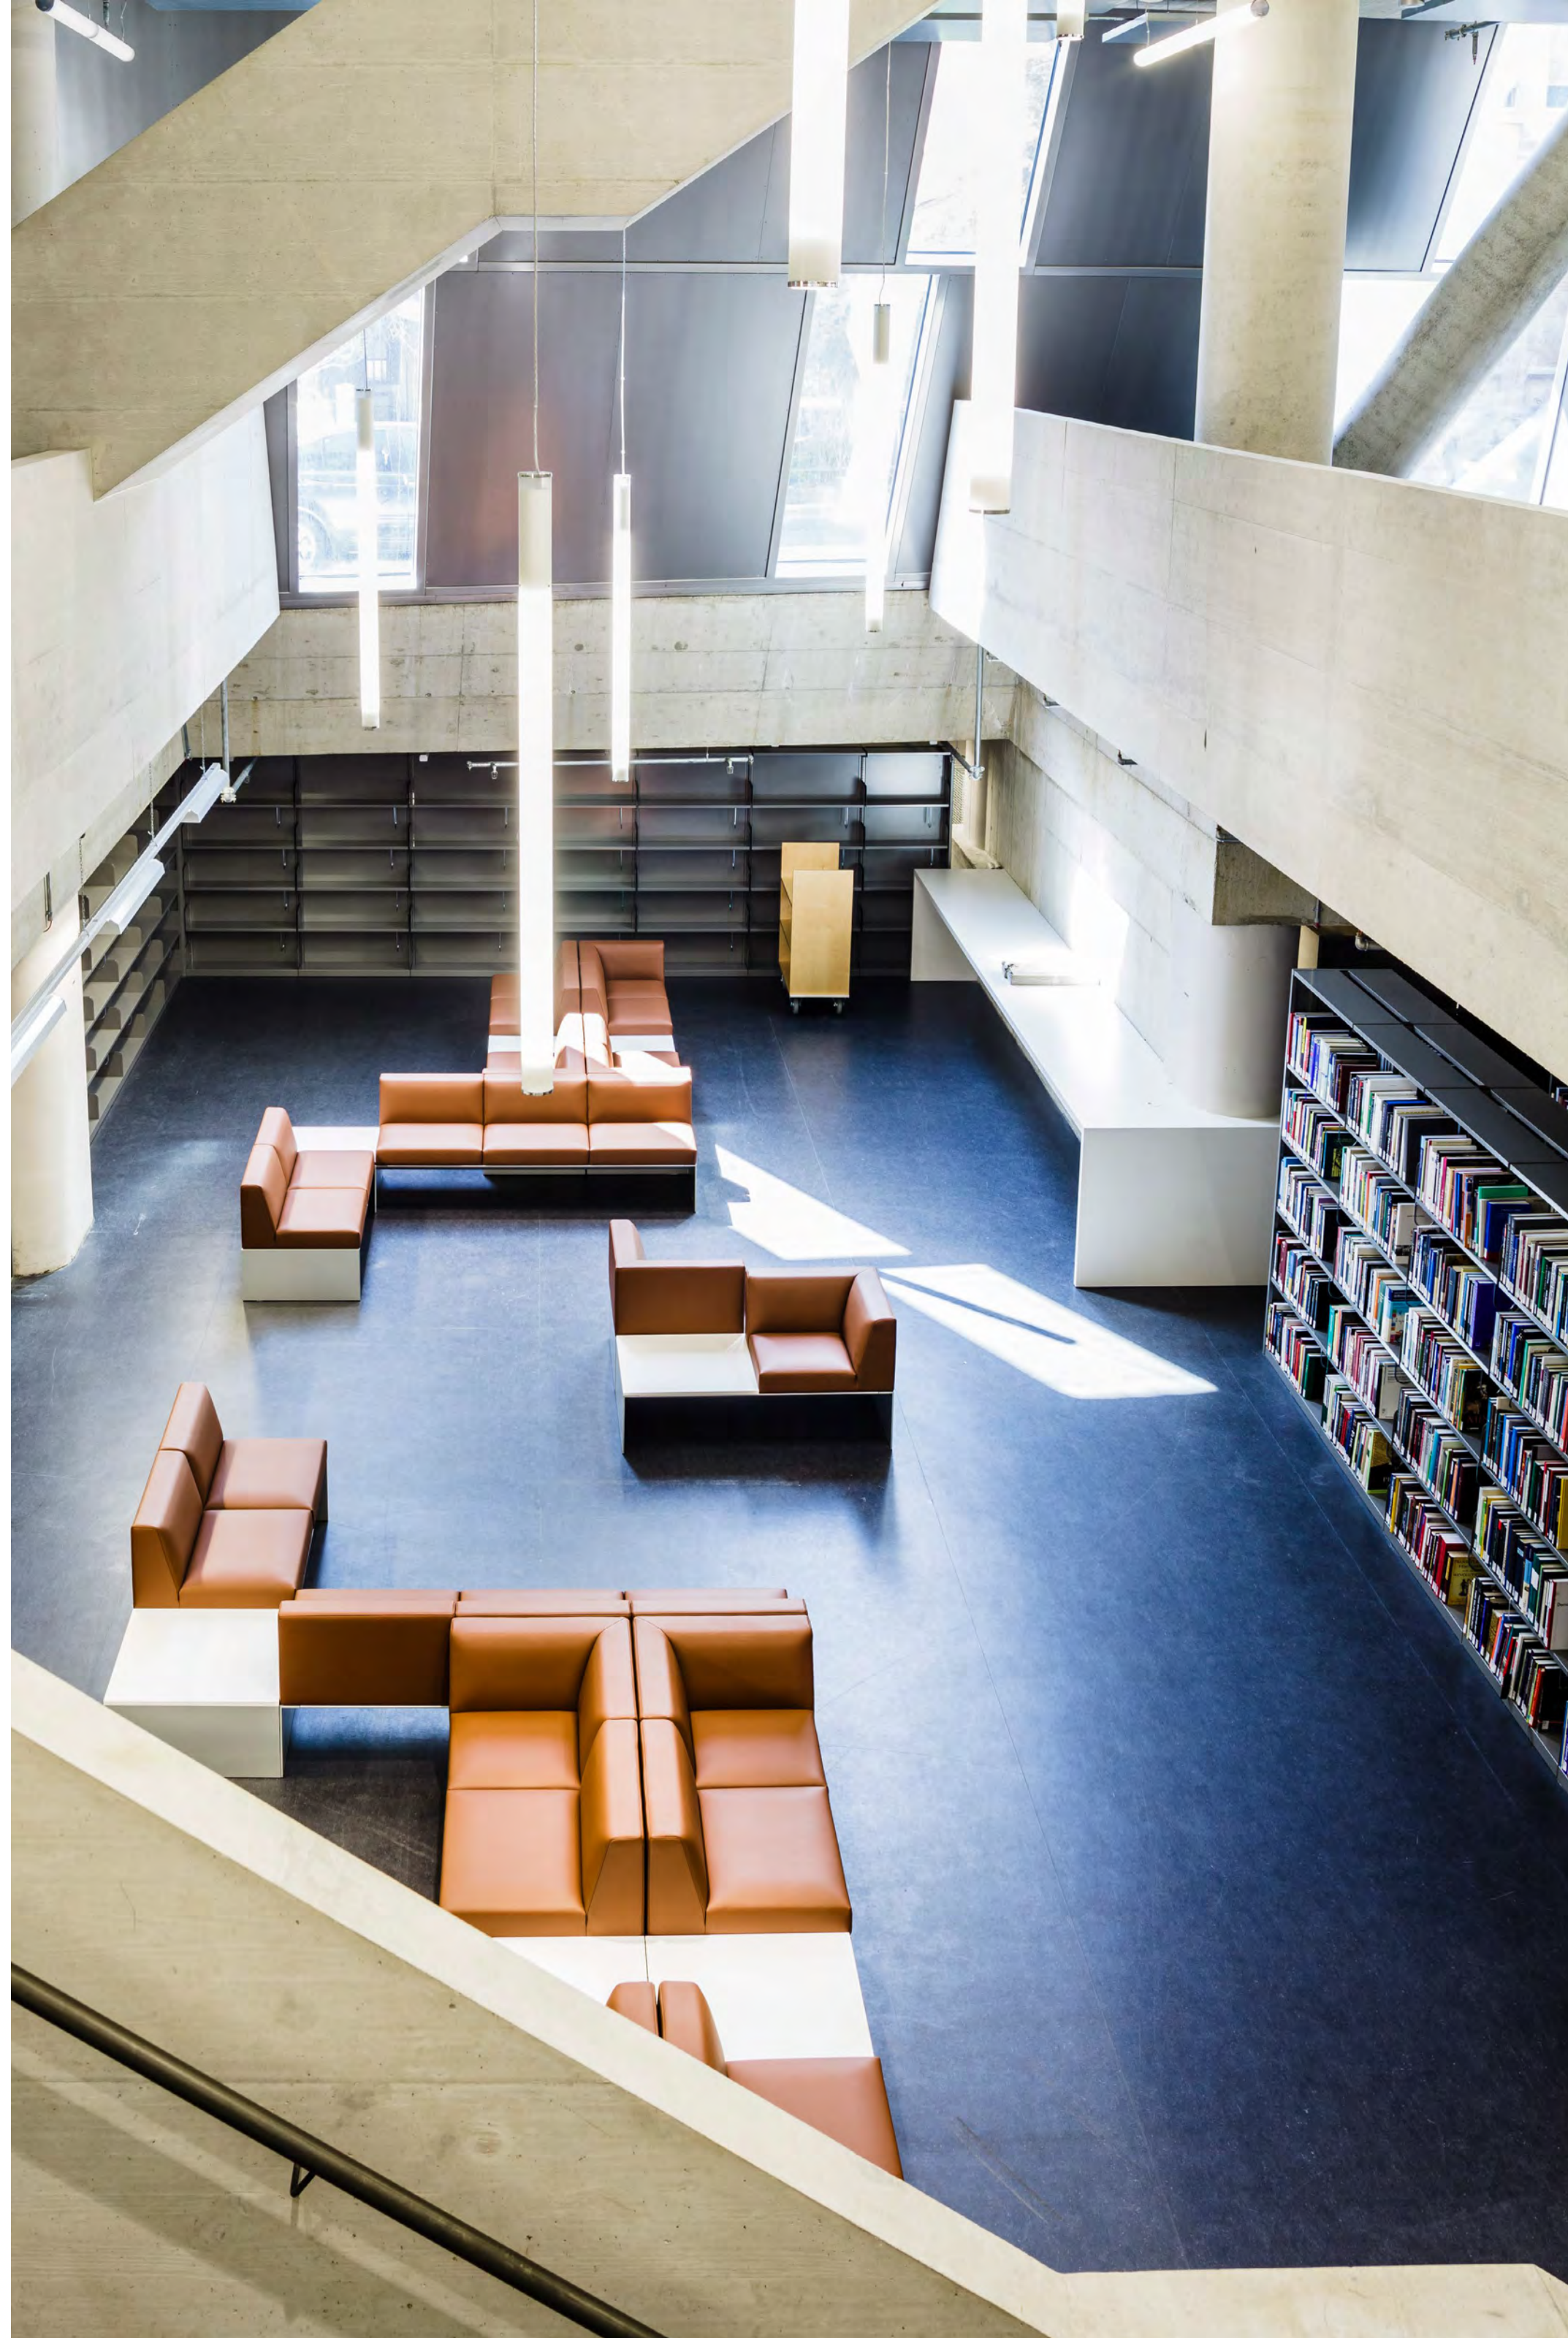

jehs+laub

**A square has never
been so versatile.**

In spite of its basic square shape, banc is a true master of metamorphosis. It turns any venue into just what you need, a conference room, waiting area or a meeting point. The modular design gives architects total freedom. This also means that banc is only finished once it is with you in the room.

**Systematically
inspired.**
