ray

A GLIMPSE OF TOMORROW'S FORMAL LANGUAGE.

- » Exciting cantilever chair with an unseen look
- » Slender, dynamic appearance thanks to delicate, curved arm-rests
- » Seamless transition between frame, seat shell and arm-rest
- » Flexible polygonal blades ensure optimum adaptation of the plastic shell to the human body
- » Top seating comfort thanks to ergonomic shape

Dynamics to Carry You Away. ray – slender, flowing, universal.

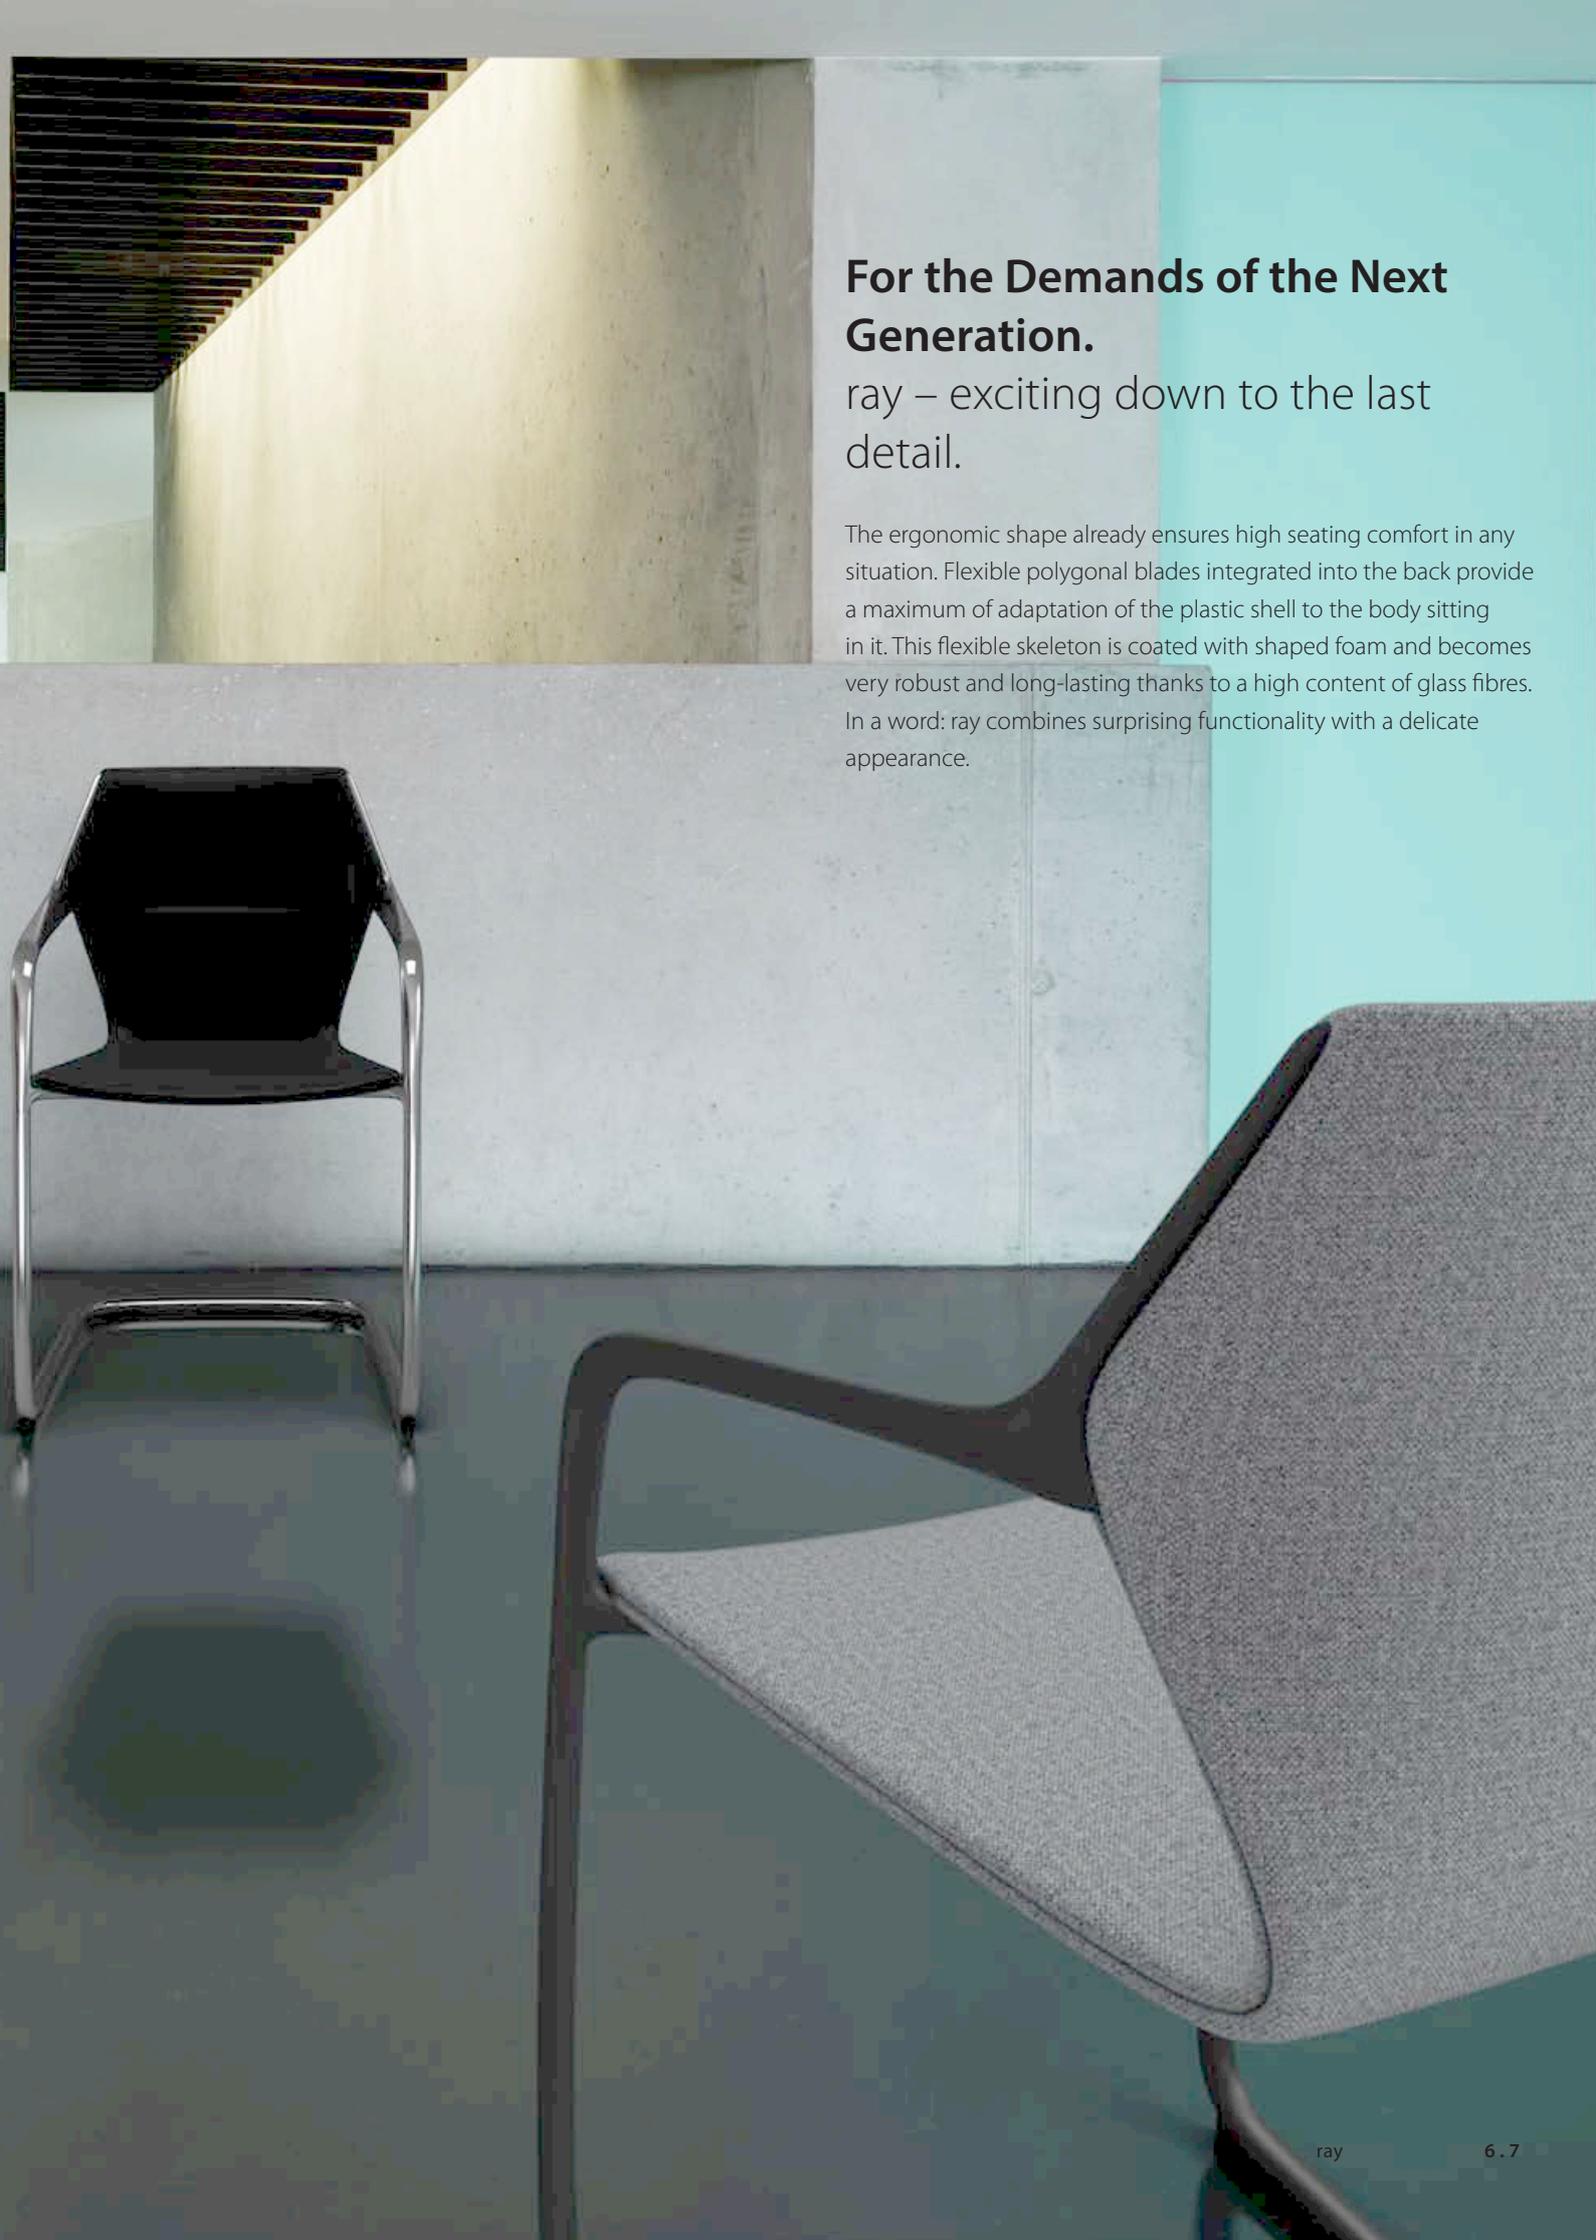

A chair, made as if all of a piece, transmitting its dynamics to any room – that's ray, no doubt about it. With its slender forms seamlessly flowing into each other, frame and seat seem to merge. The delicate, curved back is invisibly mounted to the steel frame and the plastic shell. And even the cover fabrics are fastened to the plastic shell in such a way that neither seams nor zippers are visible. The surface of the die-cast aluminium arm-rests presents itself in three different finishes: either chromed, made of polished aluminium, or with a coloured powder coating.

→ AUDITORIUM

For the Demands of the Next Generation.

ray – exciting down to the last detail.

The ergonomic shape already ensures high seating comfort in any situation. Flexible polygonal blades integrated into the back provide a maximum of adaptation of the plastic shell to the body sitting in it. This flexible skeleton is coated with shaped foam and becomes very robust and long-lasting thanks to a high content of glass fibres. In a word: ray combines surprising functionality with a delicate appearance.

Aesthetics,
characterised by
functional aspects:
ray can be stacked
without a problem
and is easy to clean,
since it has next
to no grooves. And
at the end of a long
service life, it can
be recycled in proper
fractions.

Notes

See our current pricelist for details, prices and terms of business. We reserve the right for technical changes, errors and colour variations. Some of the models depicted are special versions that are subject to additional costs. Wood is a natural product. For our lines of furniture, we exclusively use high-quality beech wood from sustainable forestry sources. Despite careful selection of the wood, there may be variations in colour. Differences in colour and structure do not constitute a reason for complaint but are rather a manifestation of the individual character of wood furniture.
